REPORTS OF THE FOURTEENTH CENSUS.

POPULATION:

- Volume I.—Number and Distribution of Inhabitants.
- Volume II.—General Report and Analytical Tables.
- Volume III.—Composition and Characteristics of the Population, by States.
- Volume IV.—Occupations.

AGRICULTURE:

- Volume V.—General Report and Analytical Tables.
- Volume VI.—Reports for States, with Statistics for Counties.
  - Part 1.—The Northern States.
  - Part 2.—The Southern States.
  - Part 3.—The Western States and the Outlying Possessions.
- Volume VII.—Irrigation and Drainage—General Report and Analytical Tables, and Reports for States, with Statistics for Counties.

MANUFACTURES:

- Volume VIII.—General Report and Analytical Tables.
- Volume IX.—Reports for States, with Statistics for Principal Cities.
- Volume X.—Reports for Selected Industries.

MINING:

- Volume XI.—Mines and Quarries—General Report and Analytical Tables, and Reports for States and Selected Industries.

ABSTRACT OF THE FOURTEENTH CENSUS.

LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., January 25, 1922.

SIR:

I transmit herewith Part 2 of Volume VI of the Reports of the Fourteenth Decennial Census. Volume VI consists of three parts, presenting detailed statistics, respectively, for (1) the Northern states, (2) the Southern states, and (3) the Western states and the outlying possessions. Each part contains a general summary for the United States and a brief summary for the three sections, in addition to the separate reports, with statistics by counties, for the states in the area to which it especially relates. The three parts of Volume VI, together with Volumes V and VII, contain the results of the 1920 census of agriculture. Volume V contains the general report and analytical tables and Volume VII contains the reports for irrigation and drainage. The census of agriculture was taken in conformity with "An act to provide for the Fourteenth and subsequent decennial censuses," approved March 3, 1919.

The collection and compilation of the statistics of agriculture and the preparation of the reports have been under the supervision of William Lane Austin, chief statistician for agriculture, assisted by Leon E. Truesdell and Samuel H. DeVault, special agents for agriculture. The chiefs of the division for agriculture during the decennial census period were Arthur J. Hirsch, Thomas A. Devor, Bowen Crandall, and Sherman S. Slick.

Respectfully,

W. M. STEUART,
Director of the Census.

Hon. HERBERT HOOVER,
Secretary of Commerce.

VOL. VI.—REPORTS FOR STATES, WITH STATISTICS FOR COUNTIES.

This volume is printed in three parts. The reports for states are arranged in the various parts as follows:

ARRANGEMENT OF STATES BY GEOGRAPHIC DIVISIONS.

PART 1.—THE NORTHERN STATES.

NEW ENGLAND DIVISION.

Maine.
New Hampshire.
Vermont.
Massachusetts.
Rhode Island.
Connecticut.

MIDDLE ATLANTIC DIVISION.

New York.
New Jersey.
Pennsylvania.

EAST NORTH CENTRAL DIVISION.

Ohio.
Indiana.
Illinois.
Michigan.
Wisconsin.

WEST NORTH CENTRAL DIVISION.

Minnesota.
Iowa.
Missouri.
North Dakota.
South Dakota.
Nebraska.
Kansas.

PART 2.—THE SOUTHERN STATES.

SOUTH ATLANTIC DIVISION.

Delaware.
Maryland.
District of Columbia.
Virginia.
West Virginia.
North Carolina.
South Carolina.
Georgia.
Florida.

EAST SOUTH CENTRAL DIVISION.

Kentucky.
Tennessee.
Alabama.
Mississippi.

WEST SOUTH CENTRAL DIVISION.

Arkansas.
Louisiana.
Oklahoma.
Texas.

PART 3.—THE WESTERN STATES AND OUTLYING POSSESSIONS.

MOUNTAIN DIVISION.

Montana.
Idaho.
Wyoming.
Colorado.
New Mexico.
Arizona.
Utah.
Nevada.

PACIFIC DIVISION.

Washington.
Oregon.
California.

OUTLYING POSSESSIONS.

Alaska.
Hawaii.
Porto Rico.
Guam.
American Samoa.
Panama Canal Zone.

Orchard fruits	28
Grapes	28
Sales of selected crops	28
Fruit products of farms	29
Forest products of farms	29
Nursery and greenhouse products	29

TABLES FOR GEOGRAPHIC DIVISIONS AND STATES.

	Page.
Rural and urban population: 1920 and 1910	30
Number of farms, and acreage of all land, improved land, woodland, and other unimproved land in farms: 1920 and 1910	31
Value of farm property, by classes: 1920 and 1910	32
Value of farm land and buildings, average values, average acreage per farm, and per cent of farm land improved: 1920 and 1910	33
Number of farms, by size: 1920 and 1910	34
Number of farms, by tenure: 1920 and 1910	35
Tenant farms classified according to form of tenancy: 1920 and 1910	36
Total farm acreage, by tenure: 1920 and 1910	37
Acreage of improved land in farms, by tenure: 1920 and 1910	38
Value of farm land and buildings, by tenure: 1920 and 1910	39
Number of farm operators, by sex and tenure, and farm acreage, by sex of farmer: 1920	40
Race and nativity of farm operators: 1920 and 1910	41
Foreign-born white farm operators, by country of birth: 1920	42
Farm acreage, by race and nativity of farmer: 1920 and 1910	43
Farm operators classified according to age: 1920 and 1910	44
Farm operators classified according to number of years on farm: 1920 and 1910	45
Mortgaged farms: 1920 and 1910	46
Farm-mortgage debt: 1920 and 1910	47
Farm expenditures for labor, fertilizer, and feed: 1919 and 1909	48
Cooperative marketing and purchasing through farmers' organizations: 1919	49
Motor vehicles, telephones, water, and light on farms: 1920	50
Value of live stock on farms: 1920 and 1910	51
Number of horses and mules on farms: 1920 and 1910	52
Number of cattle on farms: 1920 and 1910	53
Number of sheep and goats on farms: 1920 and 1910	54
Swine, poultry, and bees on farms: 1920 and 1910	55
Chickens, turkeys, ducks, geese, guinea fowls, and pigeons on farms: 1920 and 1910	56
Number of domestic animals not on farms: 1920 and 1910	57
Pure-bred live stock on farms: 1920	58
Pure-bred horses on farms, classified according to breed: 1920	59
Pure-bred cattle on farms, classified according to breed: 1920	60
Pure-bred sheep on farms, classified according to breed: 1920	61
Pure-bred swine on farms, classified according to breed: 1920	62
Value of live-stock products of farms: 1919 and 1909	63

REPORTS FOR STATES, WITH STATISTICS FOR COUNTIES

AND A SUMMARY FOR THE UNITED STATES
AND THE NORTH, SOUTH, AND WEST

THE SOUTHERN STATES

INTRODUCTION.

General description of reports.—In order to expedite the publication of the most important of the statistics, the returns for the 1920 census of agriculture were tabulated in two groups. The first group, which was termed the "major tabulation," contained most of the important fundamental subjects of the census; the second group, which was termed the "minor tabulation," contained 11 subjects which were considered to be of less importance.

The first publication of the results of the 1920 farm census took the form of a bulletin giving the number of farms in the United States, by states and counties, for 1920, 1910, and 1900. The 1920 figures in this bulletin were based on a count of the number of schedules received.

The results of the tabulation of the major subjects for the several states were published as separate bulletins as fast as the tabulations were completed. These bulletins, therefore, which are reproduced in this volume, contain the principal data obtained in the 1920 farm census, giving not only state totals but also detailed statistics by counties. In advance of their publication in the state bulletins, preliminary county figures for a few major subjects—farms, farm acreage, value of farm land and buildings, domestic animals on farms, and crops—were issued in the form of county press summaries; and state press summaries giving the most important figures for farms, farm property, live stock, live-stock products, and crops were issued for each state as soon as the preliminary figures were available. Also United States press summaries were published from time to time giving totals for the United States, by geographic divisions and states, for each of the most important items from the farm census.

The subjects in the minor tabulation, not included in the state bulletins, were as follows:

Farmers classified by age.
Farmers classified by number of years on farm.
Cooperative marketing and purchasing.
Motor vehicles, telephones, water, and light on farms.
Pure-bred live stock on farms.
Calves, pigs, and lambs, raised on farms.
Domestic animals slaughtered on farms.
Sales of selected crops.
Fruit products of farms.
Forest products of farms.
Nursery and greenhouse products.

All the above subjects except the first two were covered by press summaries issued as fast as the tabulation was completed; and all are now included in the summary of the census of agriculture for the United States which is reprinted in this volume.

Two separate bulletins, one pertaining to "Farm animals" and the other to "Farm vegetables," were issued to supplement the data given on these subjects in previous publications. The bulletin relating to farm animals contains data on cattle, swine, and chickens, giving by counties the number of each class on hand in 1920, the number of farms reporting, and the number of farms not reporting, together with the number of calves, pigs, and chickens raised, and eggs produced in 1919. The bulletin relating to farm vegetables contains detailed data for states and principal counties on potatoes, sweet potatoes, miscellaneous vegetables raised for sale, and value of farm-garden products for the calendar year 1919.

A small handbook was issued containing United States totals only for farms, farm property, live stock, live-stock products, crops, and miscellaneous products.

In the series of final reports the state bulletins are bound in three volumes—or rather in three separate "Parts" of Volume VI. Part 1 of Volume VI contains the states of the New England, Middle Atlantic, East North Central, and West North Central divisions, which are designated "The Northern States." Part 2 of Volume VI contains the states of the South Atlantic, East South Central, and West South Central divisions, which are designated "The Southern States." Part 3 of Volume VI contains the states of the Mountain and Pacific divisions, which are designated "The Western States," and also the reports for the outlying possessions of the United States—Alaska, Hawaii, Porto Rico, Guam, American Samoa, and Panama Canal Zone. In each of these three parts is also bound the summary bulletin giving the United States totals and a brief series of tables giving totals for the North, the South, and the West—divisions of the country corresponding to the three parts into which Volume VI is divided.

The general report and analysis of the results of the 1920 census of agriculture forms Volume V of the Reports of the Fourteenth Census. Volume VII contains the results of the special inquiries with regard to irrigation and drainage. These two volumes, together with the three parts of Volume VI, complete that part of the formal reports of the fourteenth census which relates to agriculture.

In addition to the eleven volumes which constitute the complete reports of the Fourteenth Census, there is published an abstract which gives in abbreviated form the most important of the results of the census of population, agriculture, manufactures, and mines and quarries. The information with regard to the census of agriculture which is given in this abstract is sufficient, perhaps, for most persons who wish to use it only in an incidental way.

Arrangement of states by geographic divisions.—Practically all of the tables giving information by states also give figures for nine groups of states, designated as geographic divisions, as well as for the United States as a whole. This grouping of states into larger units of territory facilitates the study of broad geographical conditions regarding the status of agriculture and agricultural production in different parts of the country. The states within the geographic divisions have been arranged geographically rather than alphabetically, which makes it easier to compare the conditions in any state with those in contiguous states.

Method of tabulation.—The agricultural schedules when filled out by the enumerators were examined by the supervisors and forwarded to the Bureau of the Census, Washington, D. C. Upon receipt of the schedules by the Bureau of the Census a large force of trained clerks in the Division of Agriculture were assigned to the task of editing them to make sure that the items had been properly entered on the schedules. At the census of 1920 the punch-card system of tabulation was used. It was necessary to use the punch cards owing to the large volume of data to be tabulated, and also to the limited time which was allowed for tabulating and publishing the results. Under this system, by which the agricultural statistics were tabulated, the various details as to color, tenure, sex, and age of farmer, size and value of farms, live stock, crops grown, etc., were transferred from the schedules to a series of 17 cards (prepared so as to cover the different fields of the schedule) by means of mechanical punches, the position of the holes on the cards indicating the facts to be recorded. The cards thus punched were first run through verification machines which threw out certain inconsistencies and also provided a count for subsequent checking purposes; next they were separated into classes or groups by automatic sorting machines; and finally, they were run through electric tabulating machines, which not only counted the cards themselves but recorded each of the items of information indicated on them. The totals, when established on the tabulating machines, were transferred by the machine operators to a series of thirty-eight result slips. The result slips were then verified and the necessary computations made. The tables used in the publication of the reports of the census of agriculture were made up from data taken from the result slips.

The total number of cards punched for the census of agriculture, including about 500,000 for irrigation and drainage, was nearly 144,000,000. Counting the number of times the cards were run through the sorting machines, the total number of cards sorted for the census of agriculture was 1,022,000,000 and the total number tabulated was 261,075,000. During the time when the maximum number of card-punching machines was in use, the Division of Agriculture had in operation 576 punch machines, 61 verifiers, and 18 gang punches, making a total of 655 machines for punching and verifying cards. The maximum number of cards punched in any one day was 1,087,807. The maximum equipment of sorting and tabulating machines comprised 69 sorters, 58 tabulators, and 5 counting machines.

Description of tables.—The summary for the United States presents first a series of tables, with such explanatory text as seemed necessary, giving totals for the United States as a whole for both major and minor tabulations. These tables are followed by a series of tables giving totals for geographic divisions and states as well as for the United States as a whole. In each of the three "parts" of Volume VI, the summary for the United States is followed by a brief series of tables giving totals for the North, the South, and the West—divisions of the country corresponding to the three parts into which Volume VI is divided.

The reports for each state, likewise, comprise first a series of tables which summarize the general results of the farm census for the state as a whole, with such text as was deemed necessary for the explanation of these tables. At the end of each state report are presented five county tables.

County Table I gives the principal items relating to farms and farm property in 1920, with comparative figures for the more important items for 1910 and 1900.

County Table II gives the figures for live stock on farms in 1920 and for live-stock products in 1919.

County Table III gives the numbers of domestic animals not on farms or ranges in 1920.

County Table IV gives the value of all crops and of certain important groups of crops, together with the acreage and production of the principal crops of the state.

County Table V gives the number of mortgaged farms and the mortgage debt reported for 1920, and also the farm expenditures for labor, fertilizer, and feed in 1919.

Comparability of statistics.—The 1920 farm census was taken as of January 1, while the date of enumera-

tion in 1910 was April 15, and in 1900, June 1. These changes in the date of enumeration have affected somewhat the comparability of the statistics for the different censuses. This is especially true of the statistics with regard to live stock on farms. This subject is discussed more fully in the summary for the United States, pages 22 to 25. The change in the date of enumeration would appear to have had little effect on such items as land in farms, tenure, mortgage debt, or farm values, nor did the change have any appreciable effect on the figures for crops and live-stock products, since the figures in each case refer to the calendar year preceding the date of the census. It is possible that the census of 1920 secured somewhat more accurate figures with regard to these products, since the date of enumeration followed more closely upon the close of the year for which the information was given.

Law providing for the census of agriculture.—By the terms of the Act of Congress approved March 3, 1919, the Bureau of the Census was charged with the duty of collecting statistics showing the status of the agricultural industry on January 1, 1920, and also showing the acreage of all crops and the quantities of crops and other farm products for the calendar year 1919. The information to be collected was described in the second paragraph of section 8, as follows:

> The schedules relating to agriculture shall include name, color, sex, and country of birth of occupant of each farm, tenure, acreage of farm, acreage of woodland, value of farm and improvements, and the encumbrance thereon, value of farm implements, number of live stock on farms, ranges, and elsewhere, and the acreage of crops and the quantities of crops and other farm products for the year ending December thirty-first next preceding the enumeration. Inquiries shall be made as to the quantity of land reclaimed by irrigation and drainage and the crops produced; also as to the location and character of irrigation and drainage enterprises, and the capital invested in such enterprises.

Date of enumeration.—Section 20 of the Fourteenth Census Act provided that the enumeration of population should be made as of January 1, 1920. For the sake of economy, it was considered necessary to secure the agricultural data, except of course those relating to the products of the year 1919, as of the same date. The date of enumeration of the Thirteenth Census was April 15, 1910; and at former censuses as far back as 1850—when the first comprehensive census of agriculture was taken—the date was June 1. The work of actual enumeration began on January 2, 1920, and 30 days was the time allowed to complete the enumeration.

Area of enumeration.—The Fourteenth Census enumeration for agriculture covered the United States proper and the outlying possessions, except the Philippines and the Virgin Islands. No provision was made by the Fourteenth Census Act for the enumeration of the Philippines, a census of those islands having been taken by the Philippine Government as of December 31,1918, or of the Virgin Islands, for which a special census was taken as of November 1, 1917.

Form of schedules.—The general farm schedule for the census of 1920 contained 415 inquiries, of which 157 covered an inventory as of January 1, 1920, while the remaining 258 inquiries related to farm production for the calendar year 1919.

The general farm schedule was prepared in accordance with the provisions of the Census Act and was designed for the exclusive purpose of collecting data relating to farm operators, farm land, farm property, and farm products. The data pertaining to farms and farm property, including live stock, related to January 1, 1920; those of live-stock products, crops, and farm expenditures were for the calendar year 1919.

A schedule was also prepared for the exclusive purpose of collecting data relating to domestic animals not on farms or ranges. Domestic animals not on farms or ranges were designated as those kept in inclosures such as barns, livery stables, stockyards, feed lots, vacant lots, and house yards, or, in other words, all domestic animals which were not enumerated on the general farm schedule. The information with regard to domestic animals not on farms or ranges related to January 1, 1920.

Method of taking the census.—The census of agriculture is based upon the farm schedule, which is a four-page list of questions covering all the different subjects of the farm census, with blank spaces for the replies. The information on these schedules, together with the data for the population census, was secured by a force of more than 88,000 enumerators. These enumerators, supplied with copies of the farm schedule and the population schedule, visited the individual farms and obtained the required information in each case from the farmer or from some member of his family, noting down the different items on the schedule as the information was secured. The farm schedules, one for each farm in the United States, or 6,448,343 in all, were then forwarded to Washington, where the information was tabulated and classified.

In general, therefore, the census figures represent the tabulation of returns secured direct from the farmers and should not be considered in any sense as estimates. Supplemental estimates are made for certain live-stock products, but these are presented as such, with an explanation of the method employed in making the estimates.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census established certain definitions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

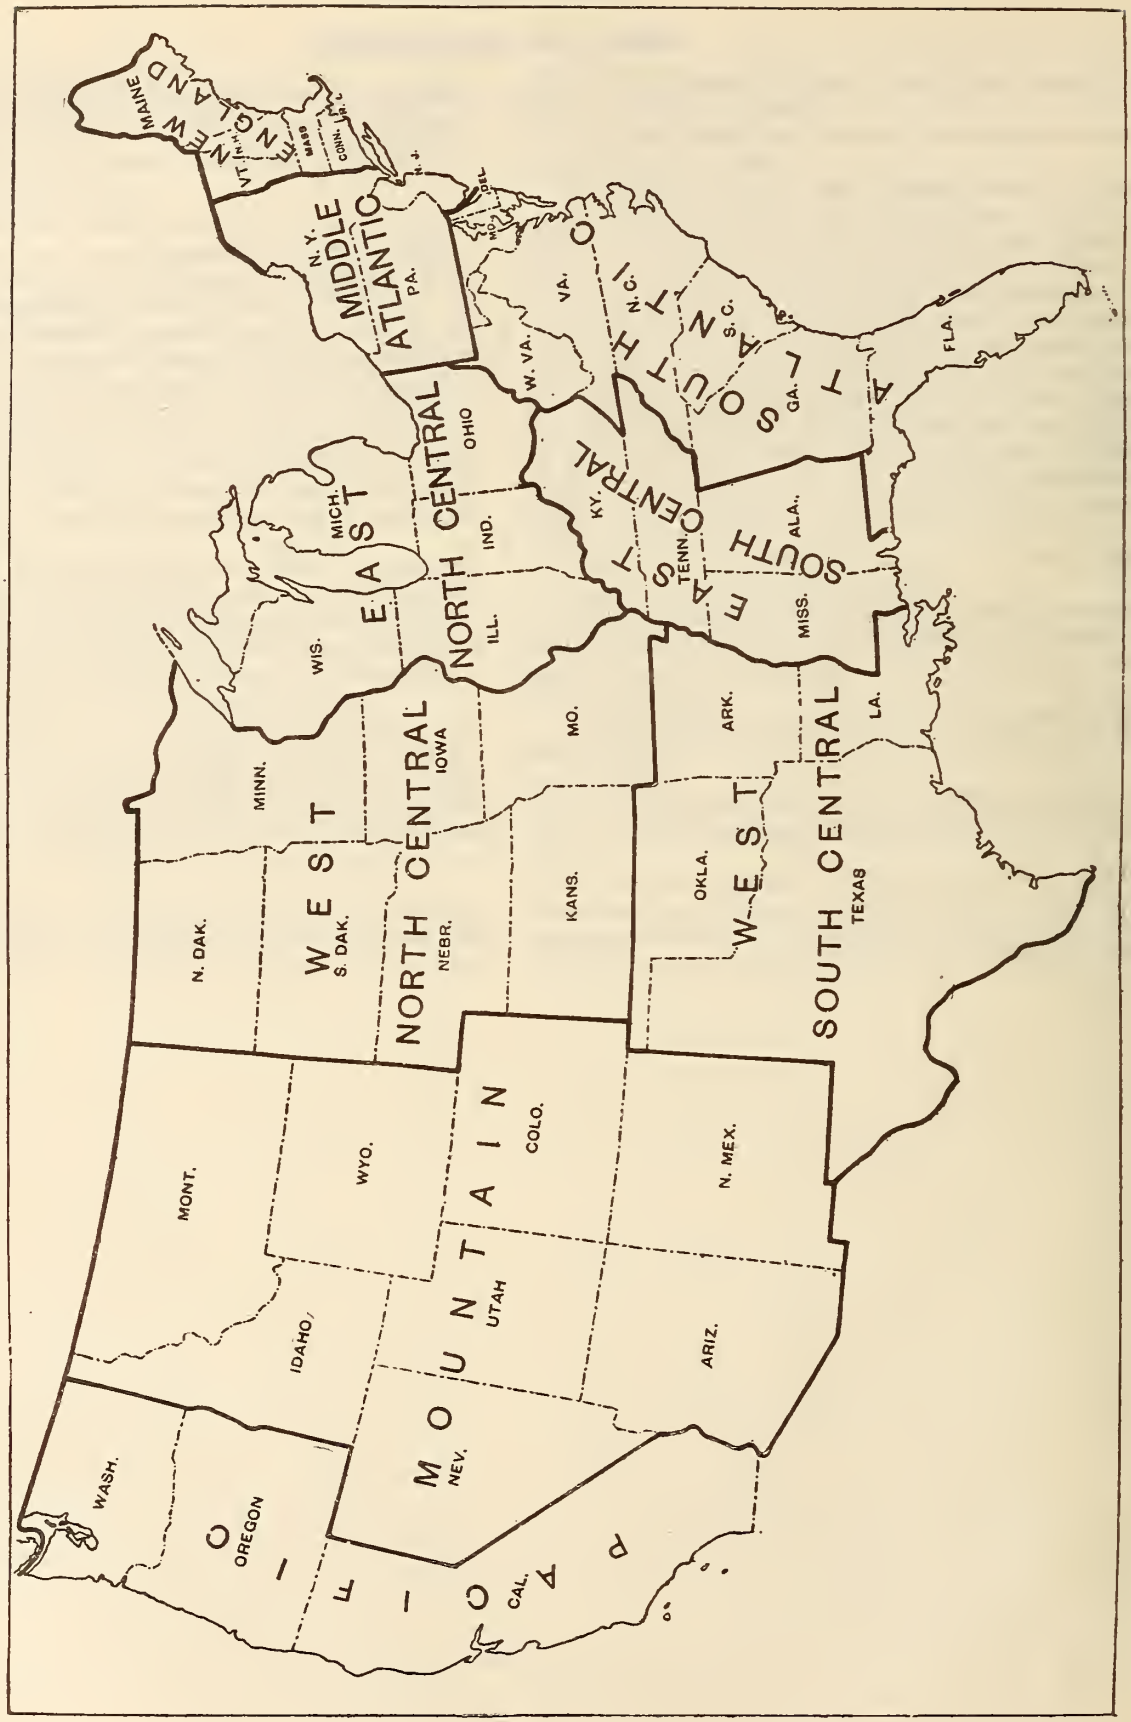
MAP OF THE UNITED STATES, SHOWING GEOGRAPHIC DIVISIONS.



SUMMARY FOR THE UNITED STATES.

INTRODUCTION.

This section presents a summary of practically all the subjects covered by the 1920 census of agriculture, including the so-called minor subjects which were omitted from the state bulletins. For the major subjects, the main features are fully presented, both for the country as a whole and also by divisions and states, but much of the detailed classification by size of farm, by tenure, etc., is omitted. Likewise, while the acreage and production of the principal farm crops are given, the number of farms reporting is generally omitted and the value is given in only a part of the tables. The minor subjects, on the other hand, are shown somewhat more fully, in order better to supplement the state bulletins.

UNITED STATES TOTALS.

Population.—The total population of the United States on January 1, 1920, according to the Fourteenth Census, was 105,710,620, as compared with 91,972,266 on April 15, 1910. The rural population, which includes all persons living outside of incorporated places having 2,500 inhabitants or over, was 51,406,017 in 1920, as compared with 49,806,146 in 1910. Thus, while there was an increase of 14.9 per cent in the total population of the United States between 1910 and 1920, the rural population as defined by the Bureau of the Census increased only 3.2 per cent, while the urban population increased 28.8 per cent. (See Table 1, footnote 2, for statement in regard to changes in classification of territory.)

TABLE 1.—POPULATION, FARMS, FARM LAND, AND FARM PROPERTY IN THE UNITED STATES: 1920 AND 1910.

[Figures for divisions and states in Tables 41, 42, 43, and 44.]

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	105,710,620	91,972,266	13,738,354	14.9
Rural [2]	51,406,017	49,806,146	1,599,871	3.2
Urban	54,304,603	42,166,120	12,138,483	28.8
Per cent rural	48.6	54.2	.....	.....
Number of farms	6,448,343	6,361,502	86,841	1.4
Approximate land area of the country.....acres	1,903,215,360	1,903,289,600	[3] −74,240	([4])
All land in farms.....acres	955,883,715	878,798,325	77,085,390	8.8

Per cent of land area in farms	50.2	46.2	.....	.....
Per cent of farm land improved	52.6	54.4	.....	.....
Average acreage per farm	148.2	138.1	10.1	7.3
Average improved acreage per farm	78.0	75.2	2.8	3.7
Value of all farm property	$77,924,100,338	$40,991,449,090	$36,932,651,248	90.1
Land and buildings	66,316,002,602	34,801,125,697	31,514,876,905	90.6
Land alone [5]	54,829,563,059	28,475,674,169	26,353,888,890	92.5
Buildings	11,486,439,543	6,325,451,528	5,160,988,015	81.6
Implements and machinery	3,594,772,928	1,265,149,783	2,329,623,145	184.1
Live stock	8,013,324,808	4,925,173,610	3,088,151,198	62.7
Average value per farm:				
All farm property	$12,084	$6,444	$5,640	87.5
Land and buildings	10,284	5,471	4,813	88.0
Land alone	8,503	4,476	4,027	90.0
Buildings	1,781	994	787	79.2
Implements and machinery	557	199	358	179.9
Live stock	1,243	774	469	60.6
Average value per acre of land in farms:				
All farm property	$81.52	$46.64	$34.88	74.8
Land and buildings	69.38	39.60	29.78	75.2
Land alone	57.36	32.40	24.96	77.0
Buildings	12.02	7.20	4.82	66.9
Implements and machinery	3.76	1.44	2.32	161.1
Live stock	8.38	5.60	2.78	49.6

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. Towns in Massachusetts, New Hampshire, and Rhode Island were included with incorporated places in making this classification. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 48,779,082. For this territory, the increase in population between 1910 and 1920 was 5.4 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

[3] Decrease in land area due to building of Pathfinder and Shoshone Reservoirs in Wyoming and several reservoirs in connection with irrigation projects in Montana.

[4] Less than one-tenth of 1 per cent decrease.

[5] These figures include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.

FARMS AND FARM PROPERTY.

Number of farms.—The number of farms in the United States on January 1, 1920, was 6,448,343, as compared with 6,361,502 in 1910. These figures represent an increase of 86,841, or 1.4 per cent. The net increase for the country as a whole, however, is the result of a much larger aggregate increase in a number of Western and Southern states, partly offset by a considerable decrease in the number of farms reported for many of the older agricultural states in the North.

It may be noted that the increase in the number of farms (1.4 per cent) is considerably less than the increase in the rural population. It would appear, however, from the returns of the enumerators and from information secured otherwise that a considerable number of tracts of farm land in certain parts of the country had not been operated during the season of 1919 by reason of the scarcity of labor, and, being thus temporarily abandoned for agricultural purposes, were not returned as farms at the census of 1920. The increase in the number of farms is also less than the increase in the total acreage or the acreage of improved land in farms—which fact is reflected in the greater average number of acres per farm.

Farm acreage.—The total area of land in farms in 1920 was 955,883,715 acres, as compared with 878,798,325 acres in 1910. The area of improved land in farms in 1920 was 503,073,007 acres, as compared with 478,451,750 acres in 1910. The total farm acreage thus shows an increase of 8.8 per cent and the improved acreage an increase of 5.1 per cent. One reason for the greater increase in total farm acreage than in improved acreage is to be found in the fact that large areas of unimproved land used mainly for grazing were added to the farm acreage in certain of the Mountain states.

The average acreage per farm in 1920 was 148.2, as compared with 138.1 in 1910, while the average farm in 1920 contained 78 acres of improved land, as compared with 75.2 acres in 1910.

Value of farm property.—The value of all farm property in 1920 was $77,924,100,338, as compared with $40,991,449,090, in 1910, representing an increase of $36,932,651,248, or 90.1 per cent. The value of land and buildings, which constituted more than five-sixths of the total, increased 90.6 per cent between 1910 and 1920; the value of implements and machinery, 184.1 per cent; and the value of live stock, 62.7 per cent. These great increases in farm values result largely, of course, from the very high prices at which farm property of all kinds was held at the beginning of the year 1920. It is interesting to note, however, that even with the abnormally high valuation which prevailed in many localities at the time the Fourteenth Census was taken, the relative increase in the value of farm property for the decade (90.1 per cent) was less than the increase between 1900 and 1910, which amounted to 100.5 per cent.

The average value of all farm property per farm in 1920 was $12,084, as compared with $6,444 in 1910. The real estate value (value of land and buildings) of the average farm in 1920 was $10,284, as compared with $5,471 in 1910, and the average per acre was $69.38 in 1920, as against $39.60 in 1910. The average value of implements and machinery per farm increased from $199 in 1910 to $557 in 1920, and the value of live stock from $774 in 1910 to $1,243 in 1920.

TABLE 2.—AVERAGE VALUE OF FARM PROPERTY PER FARM AND PER ACRE: 1920 AND 1910.

[Figures for divisions and states in Table 44.]

ITEM.	AVERAGE VALUE PER FARM.		AVERAGE VALUE PER ACRE OF LAND IN FARMS.	
	1920	1910	1920	1910
All farm property	**$12,084**	**$6,444**	**$81.52**	**$46.64**
Land and buildings	10,284	5,471	69.38	39.60
Land alone	8,503	4,476	57.36	32.40
Buildings	1,781	994	12.02	7.20
Implements and machinery	557	199	3.76	1.44
Live stock	1,243	774	8.38	5.60

Farms by size.—Of the total number of farms in the United States in 1920, 12.4 per cent were under 20 acres in size; 23.3 per cent contained from 20 to 49 acres; 22.9 per cent, from 50 to 99 acres; 22.5 per cent, from 100 to 174 acres; 15.6 per cent, from 175 to 499 acres; 2.3 per cent, from 500 to 999 acres; and 1 per cent, 1,000 acres and over.

TABLE 3.—NUMBER OF FARMS, BY SIZE: 1920 AND 1910.

[Figures for divisions and states in Table 45.]

SIZE GROUP.	NUMBER OF FARMS.		INCREASE.[1]		PER CENT DISTRIBUTION.	
	1920	1910	Number.	Per cent.	1920	1910
Total	**6,448,343**	**6,361,502**	**86,841**	**1.4**	**100.0**	**100.0**
Under 20 acres	796,535	839,166	−42,631	−5.1	12.4	13.2
Under 3 acres	20,350	18,033	2,317	12.8	0.3	0.3
3 to 9 acres	268,422	317,010	−48,588	−15.3	4.2	5.0
10 to 19 acres	507,763	504,123	3,640	0.7	7.9	7.9
20 to 49 acres	1,503,732	1,414,376	89,356	6.3	23.3	22.2
50 to 99 acres	1,474,745	1,438,069	36,676	2.6	22.9	22.6
100 to 174 acres	1,449,630	1,516,286	−66,656	−4.4	22.5	23.8
175 to 499 acres	1,006,477	978,175	28,302	2.9	15.6	15.4
175 to 259 acres	530,800	534,191	−3,391	−0.6	8.2	8.4
260 to 499 acres	475,677	443,984	31,693	7.1	7.4	7.0
500 to 999 acres	149,819	125,295	24,524	19.6	2.3	2.0
1,000 acres and over	67,405	50,135	17,270	34.4	1.0	0.8

[1] A minus sign (−) denotes decrease.

Farms by tenure.—The farms operated by their owners in 1920 comprised 60.9 per cent of the total number; farms operated by managers, 1.1 per cent; and farms operated by tenants, 38.1 per cent. In 1910, 37 per cent of all farms were operated by

tenants; in 1900, 35.3 per cent; in 1890, 28.4 per cent; and in 1880, 25.6 per cent. It thus appears that while the percentage of farms operated by tenants has increased during the last decade, the increase is not so great as that shown in any of the earlier decades for which figures are available.

TABLE 4.—NUMBER OF FARMS, BY TENURE: 1920 AND 1910.

[Figures for divisions and states in Tables 46 and 47.]

TENURE.	NUMBER OF FARMS.		INCREASE.[1]		PER CENT DISTRIBUTION.	
	1920	1910	Number.	Per cent.	1920	1910
Total	6,448,343	6,361,502	86,841	1.4	100.0	100.0
Owners	3,925,090	3,948,722	−23,632	−0.6	60.9	62.1
Owning entire farm	3,366,510	3,354,897	11,613	0.3	52.2	52.7
Hiring additional land	558,580	593,825	−35,245	−5.9	8.7	9.3
Managers	68,449	58,104	10,345	17.8	1.1	0.9
Tenants	2,454,804	2,354,676	100,128	4.3	38.1	37.0
Share tenants[2]	1,678,812	1,399,923	278,889	19.9	26.0	22.0
Share-cash tenants	127,822	128,466	−644	−0.5	2.0	2.0
Cash tenants[3]	585,005	712,294	−127,289	−17.9	9.1	11.2
Unspecified	63,165	113,993	−50,828	−44.6	1.0	1.8

[1] A minus sign (−) denotes decrease.
[2] The 1920 figures include 561,091 croppers reported in Southern states.
[3] The 1920 figures include 104,996 standing renters reported in Southern states.

The total farm acreage was distributed by tenure in 1920 as follows: Owners, 66.6 per cent; managers, 5.7 per cent; and tenants, 27.7 per cent. It is apparent, therefore, that on the basis of acreage the relative importance of the farms operated by owners and managers is considerably greater than the mere number of the farms would indicate.

Of the improved acreage, 62.4 per cent was operated by owners; 2.6 per cent by managers; and 34.9 per cent by tenants. The distribution of the value of land and buildings corresponds very closely to the distribution of improved land, except that farms operated by managers form a slightly larger proportion.

TABLE 5.—FARM ACREAGE AND VALUE, BY TENURE: 1920 AND 1910.

[Figures for divisions and states in Tables 48, 49, and 50.]

Tenants	23,786,563,230	10,977,232,427	12,809,330,803	116.7	35.9	31.5

The average acreage of all farms in the United States in 1920 was 148.2; of farms operated by owners, 162.2; by managers, 790.8; and by tenants, 107.9.

The percentages of farm land improved, for farms classified according to tenure, were as follows: Owners, 49.3; managers, 24.4; and tenants, 66.3. The high percentage of improved land in the tenant farms is due to the fact that many tenants hire simply that area of crop land which they expect to cultivate.

The average value of land and buildings for farms operated by owners was $10,156; by managers, $38,937; and by tenants, $9,690.

TABLE 6.—AVERAGE ACREAGE, PER CENT OF FARM LAND IMPROVED, AND AVERAGE VALUES, BY TENURE: 1920 AND 1910.

[Figures for average acreage per farm and per cent of farm land improved, by divisions and states, in Tables 48 and 49.]

Farms by sex, race, and nativity of farmer.—At the census of 1920, for the first time, farms were classified according to the sex of the operator. Of the total number of farms in the United States (6,448,343), 6,186,624 were operated by males and 261,719 by females, the latter figure representing 4.1 per cent of the total. The average acreage of the farms operated by women was 99.7, as compared with 150.3 for the farms operated by men.

TABLE 7.—NUMBER AND ACREAGE OF FARMS, CLASSIFIED BY SEX AND TENURE OF FARMER: 1920.

[Figures for divisions and states, except acreage by tenure, in Table 51.]

SEX AND TENURE.	FARMS.		FARM ACREAGE.	
	Number.	Per cent distribution.	Total.	Average per farm.
All farmers	6,448,343	100.0	955,883,715	148.2
Male	6,186,624	95.9	929,779,029	150.3
Female	261,719	4.1	26,104,686	99.7
Owners	3,925,090	100.0	636,775,015	162.2
Male	3,737,222	95.2	614,185,155	164.3
Female	187,868	4.8	22,589,860	120.2
Managers	68,449	100.0	54,129,157	790.8
Male	67,679	98.9	53,943,874	797.1
Female	770	1.1	185,283	240.6
Tenants	2,454,804	100.0	264,979,543	107.9
Male	2,381,723	97.0	261,650,000	109.9
Female	73,081	3.0	3,329,543	45.6

Of the total number of farms in the United States in 1920, 76.3 per cent were operated by native white farmers, 9 per cent by foreign-born white farmers, and 14.7 per cent by colored farmers. In 1910 the percentages were 75 for native white, 10.5 for foreign-

born white, and 14.5 for colored. The most significant change between 1910 and 1920 was the decrease in the percentage of farms operated by foreign-born white farmers.

The 949,889 colored farmers in the United States in 1920 comprised 925,708 Negroes, 16,680 Indians, 6,892 Japanese, and 609 Chinese.

The average size of the farms operated by colored farmers in 1920 was 47.3 acres, as compared with 191.3 for the foreign-born white farmers and 162.6 for the native white farmers. The difference in these averages is due in part, however, to the fact that most of the colored farmers are in the Southern states, where the average size of all farms is small, while most of the foreign-born white farmers are in states where the average size of farms is rather large.

TABLE 8.—NUMBER AND ACREAGE OF FARMS, CLASSIFIED BY COLOR AND NATIVITY OF FARMER: 1920 AND 1910.

[Figures for divisions and states in Tables 52 and 54.]

Other European countries	20,107	17,689
Mexico	12,142	(2)
Canada	48,668	61,878
All other countries	7,765	10,333

[1] Included with "Other European countries."
[2] Included with "All other countries."

The foreign countries which contributed the largest numbers to the total of 581,068 foreign-born white farmers in the United States, as reported for 1920, were as follows: Germany, 140,667; Sweden, 60,461; Norway, 51,599; Canada, 48,668; Russia, 32,388; Austria, 30,172; England, 26,614; and Denmark, 25,565. It should be noted that this order by no means corresponds to the order in which the various foreign countries have contributed to the total population of the United States. The immigrants from certain countries, notably Italy, Poland, and Ireland, have gone chiefly into pursuits other than agricultural.

Age of farmers.—Of the total number of farm operators in the United States in 1920 for whom age was reported, 6 per cent were under 25 years of age; 20.9 per cent were from 25 to 34 years of age; 24.9 per cent, from 35 to 44 years of age; 23.3 per cent, from 45 to 54 years of age; 15.6 per cent, from 55 to 64 years of age; and 9.2 per cent were 65 years old and over.

TABLE 10.—FARM OPERATORS, BY AGE: 1920 AND 1910.

[Figures for divisions and states in Table 55.]

AGE.	NUMBER OF FARM OPERATORS.		PER CENT DISTRIBUTION.

Farmers classified by number of years on farm.—On the basis of the number of years they had been on the farms which they were operating when the census was taken, the total number of farm operators in 1920 (omitting those who failed to report this item) was distributed as follows: Less than 1 year, 10.6 per cent; 1 year, 14.4 per cent; 2 to 4 years, 22.4 per cent; 5 to 9 years, 17.4 per cent; and 10 years and over, 35.1 per cent.

TABLE 11.—FARM OPERATORS, BY NUMBER OF YEARS ON FARM: 1920 AND 1910.

[Figures by divisions and states in Table 56.]

NUMBER OF YEARS ON FARM.	NUMBER OF FARM OPERATORS.		PER CENT DISTRIBUTION.	
	1920	1910	1920	1910
Total	**6,448,343**	**6,361,502**	.....	.....
Reporting years on farm	6,227,539	5,794,768	100.0	100.0
Less than 1 year	660,713	1,000,293	10.6	17.3

2 to 4 years	1,397,958	1,371,607	22.4	23.7
5 to 9 years	1,086,458	992,468	17.4	17.1
10 years and over	2,184,391	1,802,540	35.1	31.1
Not reporting years on farm	220,804	566,734	.....	.....

Farm mortgages.—The total number of farms operated by their owners in the United States on January 1, 1920, was 3,925,090. Of this number, 1,461,306 farms, or 37.2 per cent, were reported as mortgaged and 2,074,325 as free from mortgage, while for 389,459 farms the mortgage status was not specified.

Of the 3,948,722 farms operated by their owners in 1910, 1,312,034, or 33.2 per cent, were reported as mortgaged and 2,588,596 as free from mortgage, while for 48,092 farms no mortgage report was received.

The Bureau of the Census does not attempt to secure mortgage data for farms operated by tenants or managers, because the tenant or manager in very many cases would not know whether the farm was mortgaged or not, and would be even less likely to know the amount of the mortgage debt.

The percentage of owned farms mortgaged increased from 33.2 in 1910 to 37.2 in 1920. This increase does not necessarily represent any lack of prosperity, since the money is borrowed in many instances for profitable investment in improvements or for the purchase of additional land. In fact, a large part of the total doubtless represents the balance due on the purchase price from recent purchasers who have paid a part of the price of the farm and given a mortgage for the rest.

TABLE 12.—NUMBER OF MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned wholly or in part by their operators. Figures for divisions and states in Table 57.]

CLASS.	NUMBER OF FARMS OPERATED BY THEIR OWNERS.		INCREASE.[1]		PER CENT DISTRIBUTION.	
	1920	1910	Number.	Per cent.	1920	1910
Total	3,925,090	3,948,722	−23,632	−0.6	100.0	100.0
Free from mortgage	2,074,325	2,588,596	−514,271	−19.9	52.8	65.6
Mortgaged	1,461,306	1,312,034	149,272	11.4	37.2	33.2
Unknown (no report)	389,459	48,092	341,367	709.8	9.9	1.2

[1] A minus sign (−) denotes decrease. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

While the figures given above relative to the number of mortgaged farms in the United States include the farms operated by part owners—that is, farms whose owners hired some additional land—the figures representing the amount of the mortgage debt relate only to those farms which consisted wholly of land owned by the operator. This limitation was made necessary by the difficulty of ascertaining the value of that part of the farm which was covered by the mortgage, where the farmer owned a part of the farm and hired a part of it. The total number of farms reported as mortgaged in 1920 (1,461,306) comprised 1,217,234 farms operated by full owners and 244,072 farms operated by part owners.

The number of farms operated by full owners for which the amount of mortgage debt was reported in 1920 was 1,193,047, as compared with 1,006,511 in 1910. The amount of the farm mortgage debt reported was $4,003,767,192 in 1920, as against $1,726,172,851 in 1910. The amount of debt thus increased $2,277,594,341, or 131.9 per cent, while the value of the mortgaged farms increased 117.6 per cent during the decade.

The value of the farms for which the amount of the mortgage debt was reported in 1920 was $13,775,500,013. The debt therefore represented 29.1 per cent of the value, as compared with 27.3 per cent in 1910.

The average rate of interest paid on farm mortgages in the United States in 1920 was 6.1 per cent.

TABLE 13.—FARM MORTGAGE DEBT: 1920 AND 1910.

[Data relate only to farms owned by their operators and reporting amount of debt. Farms whose operators hired additional land are not included. Figures for divisions and states in Table 58.]

ITEM.	1920	1910	INCREASE.	
			Amount.	Per cent.
Number of farms reporting amount of debt	1,193,047	1,006,511	186,536	18.5
Value of land and buildings	$13,775,500,013	$6,330,236,951	$7,445,263,062	117.6
Amount of mortgage debt	$4,003,767,192	$1,726,172,851	$2,277,594,341	131.9
Ratio of debt to value, per cent	29.1	27.3	.....	.....
Average interest rate, per cent	6.1	.....	.....	.....
Average value per farm	$11,546	$6,289	$5,257	83.6
Average debt per farm	$3,356	$1,715	$1,641	95.7
Average equity per farm	$8,191	$4,574	$3,617	79.1

Farm expenditures for labor, fertilizer, and feed.—The total amount expended for farm labor in the United States in 1919 was $1,356,403,452, as compared with $651,611,287 in 1909. These figures show an increase of $704,792,165, or 108.2 per cent, due largely, without doubt, to the high wages paid for farm labor in 1919. Of the total expenditure in 1919, 81 per cent represented cash payments and 19 per cent the value of rent and board furnished.

The amount expended by farmers for fertilizer in 1919 was $326,399,800, as compared with $114,882,541 in 1909, representing an increase of $211,517,259, or 184.1 per cent.

TABLE 14.—FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

[Figures for divisions and states in Table 59.]

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$1,356,403,452	$651,611,287	$704,792,165	108.2
Amount in cash	1,098,604,590	521,729,941	576,874,649	110.6
Value of rent and board furnished	257,798,862	129,881,346	127,917,516	98.5
Fertilizer	326,399,800	114,882,541	211,517,259	184.1
Feed	1,097,452,187	299,839,857	797,612,330	266.0

The farm expenditures for feed in 1919 amounted to $1,097,452,187, as compared with $299,839,857 in 1909, indicating an increase of $797,612,330, or 266 per cent. The greater part of this increase is doubtless the result of the much higher prices prevailing in 1919 for hay, corn, oats, and mill feed, which constituted the bulk of the feed purchased by farmers.

Cooperative marketing and purchasing.—The number of farms reporting cooperative marketing of farm products or cooperative purchasing of supplies through farmers' organizations in 1919 was 624,527, or 9.7 per cent of all farms in the United States. This number includes 216,305 farms which reported both sales and purchases, 295,078 farms which reported sales only, and 113,144 farms which reported purchases only. The number of farms reporting cooperative sales of farm products was therefore 511,383, and the number reporting cooperative purchases of farm supplies was 329,449.

The value of the products sold through farmers' marketing organizations in 1919 amounted to $721,983,639, or an average of $1,412 for each farm reporting. The most important products marketed in this way were grain, milk and cream, fruits, and truck crops.

The value of the supplies purchased through farmers' organizations in 1919 amounted to $84,615,669, or an average of $257 for each farm reporting. Important items purchased cooperatively were fertilizer, feed, binder twine, spraying materials, coal, and crates and boxes.

TABLE 15.—COOPERATIVE MARKETING AND PURCHASING THROUGH FARMERS' ORGANIZATIONS IN THE UNITED STATES: 1919.

[Figures for divisions and states in Table 60.]

ITEM.	FARMS REPORTING.		AMOUNT.	
	Number.	Per cent of all farms.	Total.	Average per farm.
Marketing or purchasing	624,527	9.7		
Marketing	511,383	7.9	$721,983,639	$1,412
Purchasing	329,449	5.1	84,615,669	257

Motor vehicles, telephones, water, and light on farms.—The number of farms which had automobiles on January 1, 1920, was 1,979,564, which number represents 30.7 per cent of all the farms in the United States. Two per cent of the farms reported motor trucks; 3.6 per cent reported tractors; 38.7 per cent reported telephones; 10 per cent reported water piped into the house; and 7 per cent reported gas or electric light.

TABLE 16.—MOTOR VEHICLES, TELEPHONES, WATER, AND LIGHT ON FARMS: 1920.

[Figures for divisions and states in Table 61.]

LIVE STOCK ON FARMS AND ELSEWHERE.

Value of live stock on farms.—The total value of live stock (including poultry and bees) on farms in the United States on January 1, 1920, was $8,013,324,808, as compared with $4,925,173,610 on April 15, 1910. This represents an increase of $3,088,151,198, or 62.7 per cent. To the 1920 total, the value of cattle contributed $3,651,970,229; the value of horses and mules, $2,561,371,898; and the value of swine, $988,582,380.

The average value of horses per head in 1920 was $90.15, as compared with $105.06 in 1910; the average for mules was $143.45 in 1920 and $124.80 in 1910; for cattle, $54.79 and $24.26, respectively; for sheep, $11.29 and $4.44; and for swine, $16.66 in 1920 as against $6.86 in 1910. It thus appears that while the average value per head of the several kinds of meat animals (cattle, sheep, and hogs) more than doubled between 1910 and 1920, the case was quite different with draft animals, horses showing a decrease in average value and mules only a moderate increase.

TABLE 17.—VALUE OF LIVE STOCK ON FARMS: 1920 AND 1910.

[Figures, except for bees, by divisions and states, in Table 62.]

CLASS.	1920 (Jan. 1)	1910 (Apr. 15)	INCREASE.[1]	
			Amount.	Per cent.

Sheep	11.29	4.44	6.85	154.3
Swine	16.66	6.86	9.80	142.9

[1] A minus sign (−) denotes decrease.
[2] Includes the value of special classes of animals (buffaloes, deer, etc.), not included under "Domestic animals," to the amount of $76,682.

Horses, mules, and asses and burros on farms.—The number of horses on farms in the United States on January 1, 1920, was 19,767,161, and the number of mules was 5,432,391. The number of horses reported at the 1910 census was 19,833,113, and the number of mules, 4,209,769. In making comparisons, however, between these figures and the numbers of horses and mules reported for 1920, the change in the date of enumeration from April 15 in 1910 to January 1 in 1920 must be taken into account. The 1920 census, taken as of January 1, was too early to include any spring colts, while the 1910 census, taken as of April 15, included 612,775 horse colts and 109,257 mule colts born between January 1

and April 15. On the other hand, since a considerable number of horses and mules are lost by death every year between January 1 and April 15, an enumeration made in January would include a larger number of mature horses and mules than an enumeration made in April of the same year. The number of mature animals thus gained by the earlier enumeration in 1920 would offset to some extent the number of spring colts enumerated in 1910.

Taking the figures as they stand, the number of horses reported for 1920 represents a decrease of 65,952, or 0.3 per cent, as compared with the total number reported for 1910. If the spring colts are excluded from the 1910 figure, however, then the 1920 figure represents an increase of 546,823, or 2.8 per cent. The actual increase in the number of horses was considerably less than this, but there was doubtless some increase rather than a decrease.

Comparing in the same way the number of mules reported in 1920 with the number reported for 1910, the figures indicate an increase of 1,222,622, or 29 per cent, while if the spring colts are excluded from the 1910 figures the difference is 1,331,879, or 32.5 per cent. The actual increase is doubtless somewhere between these two figures.

The number of asses and burros reported for 1920 was 72,491, as compared with 105,698 in 1910.

TABLE 18.—HORSES, MULES, AND ASSES AND BURROS ON FARMS: 1920 AND 1910.

[Figures for horses and mules, by divisions and states, in Table 63.]

CLASS.	Number.
Horses on farms Jan. 1, 1920, total	19,767,161
Colts under 1 year of age	1,198,236

Horses on farms Apr. 15, 1910, total	19,833,113
Spring colts	612,775
Horses born before Jan. 1, 1910	19,220,338
Mules on farms Jan. 1, 1920, total	5,432,391
Mule colts under 1 year of age	389,279
Mule colts 1 year old and under 2 years	391,418
Mules 2 years old and over	4,651,694
Mules on farms Apr. 15, 1910, total	4,209,769
Spring colts	109,257
Mules born before Jan. 1, 1910	4,100,512
Asses and burros on farms Jan. 1, 1920	72,491
Asses and burros on farms Apr. 15, 1910	105,698

Cattle on farms.—The number of cattle on farms in the United States on January 1, 1920, was 66,652,559, comprising 35,288,100 beef cattle (cattle kept mainly for beef production) and 31,364,459 dairy cattle (cattle kept mainly for milk production).

The number of cattle reported at the census of 1910 was 61,803,866, but the change in the date of enumeration must be taken into account in making comparisons between the two years. The 1910 census, taken as of April 15, included 7,806,539 calves born between January 1 and April 15, 1910, or probably more than one-half of the calves born in the spring of that year. On the other hand, the cattle enumerated as of January 1, 1920, included large numbers of animals destined to be slaughtered or marketed before April 15. The number of cattle thus gained by the earlier enumeration in 1920 would offset to a great extent the number of spring calves included in the total for 1910.

The total number of cattle reported for 1920 exceeds the total number in 1910 by 4,848,693, or 7.8 per cent. The actual increase, after due allowance has been made for the effects of the change in the date of enumeration, is doubtless considerably more than this but less than the difference between the number of cattle in 1910, excluding spring calves, and the number of cattle in 1920, which would amount to 12,655,232.

Dairy cows, as they were classified in 1910, included all dairy heifers 15½ months old and over on April 15 (1 year old on January 1 of the census year). Dairy cows under the 1920 classification, however, included only cows 2 years old and over on January 1. The number of dairy cows 2 years old and over reported for 1920 was 19,675,297 and the number of dairy heifers 1 year old and under 2 years was 4,048,851. There were thus 23,724,148 dairy cows and heifers 1 year old and over on farms in 1920, as compared with 20,625,432 in 1910. This gives an increase of 3,098,716, or 15 per cent.

Or the comparison may be made in another way. On the basis of the age distribution in 1920 it is estimated that the total number of dairy cows reported for 1910 included only 17,125,471 cows which were 2 years old and over on January 1 of the census year. In comparison with this figure, the number of dairy cows 2 years old and over reported for 1920 represents an increase of 2,549,826.

TABLE 19.—CATTLE ON FARMS: 1920 AND 1910.

[Figures for divisions and states in Table 64.]

CLASS.	Number.
Cattle on farms Jan. 1, 1920, total	66,652,559
Beef cattle, total	35,288,100
Calves under 1 year of age	8,607,938
Heifers 1 year old and under 2 years	3,981,205
Cows and heifers 2 years old and over	12,624,996
Steers 1 year old and under 2 years	4,650,347
Steers 2 years old and over	4,629,778
Bulls 1 year old and over	725,165
Unclassified	68,671
Dairy cattle, total	31,364,459
Calves under 1 year of age	6,867,991
Heifers 1 year old and under 2 years	4,048,851
Cows and heifers 2 years old and over	19,675,297
Bulls 1 year old and over	772,320
Cattle on farms Apr. 15, 1910, total	61,803,866
Spring calves	7,806,539
Cattle born before Jan. 1, 1910	53,997,327
Dairy cows and heifers born before Jan. 1, 1909	20,625,432
Dairy cows 2 years old and over on Jan. 1, 1910 (estimated)	17,125,471

In addition to the change in age classification, there was also a change between 1910 and 1920 in the definition of a dairy cow. The 1910 farm schedule called for "cows kept for milk" and included in this classification practically all cows milked for three months or more during the year, while the 1920 schedule defined dairy cows as those "kept mainly for milk production." It was expected that this change in definition would result in a material decrease in the number of dairy cows reported in 1920, with a corresponding increase in the number of beef cows, as compared with the numbers that would have been reported under the 1910 classification. As a matter of fact, however, it appears to have had very little effect on the relative numbers of cows of the two classes, except in those states where beef cattle are especially important.

Sheep and goats on farms.—The number of sheep on farms in the United States on January 1, 1920, was 35,033,516, while the number of sheep reported for April 15, 1910, was 52,447,861. The 1920 census, however, taken as of January 1, was too early to include any spring lambs, while the 1910 census, taken as of April 15, included 12,803,815 lambs born between January 1 and April 15, 1910. On the other hand, the sheep enumerated as of January 1, 1920, included large numbers of animals destined to be slaughtered or marketed before April 15. These animals, of course, would offset to some extent the spring lambs included in the 1910 census.

Taking as a basis of comparison the total number of sheep reported in 1910, the figures show a decrease of 17,414,345 sheep between 1910 and 1920; on the basis of the 1910 figures for sheep, exclusive of spring lambs, the decrease would be 4,610,530. The actual decrease is doubtless greater than the last-mentioned figure (greater by approximately the number of sheep and lambs slaughtered during the first 3½ months of 1910), but decidedly less than the nominal figure of 17,414,345.

TABLE 20.—SHEEP AND GOATS ON FARMS: 1920 AND 1910.

[Figures for divisions and states in Table 65.]

CLASS.	Number.
Sheep on farms Jan. 1, 1920, total	**35,033,516**
Lambs under 1 year of age	8,925,815
Ewes 1 year old and over	23,518,631
Rams 1 year old and over	808,808
Wethers 1 year old and over	1,496,576
Unclassified	283,686
Sheep on farms Apr. 15, 1910, total	**52,447,861**
Spring lambs	12,803,815
Sheep born before Jan. 1, 1910	39,644,046
Goats on farms Jan. 1, 1920, total	**3,458,925**
Kids under 1 year of age, raised for fleeces	511,573
Goats 1 year old and over, raised for fleeces	1,590,018
All other goats	1,357,334
Goats on farms Apr. 15, 1910	**2,915,125**

The number of goats reported for January 1, 1920, was 3,458,925, as compared with 2,915,125 on April 15, 1910. These figures represent a nominal increase of 543,800 goats during the decade. The actual increase, after making allowance for the change in the date of enumeration, is doubtless considerably more than that.

Swine on farms.—The number of swine on farms in the United States on January 1, 1920, was 59,346,409, while the number on April 15, 1910, was 58,185,676. The 1920 census, taken in January, was too early to include any spring pigs, while the 1910 census, taken as of April 15, included 23,051,579 pigs born between January 1 and April 15, 1910. On the other hand, any farm census taken in January would include large numbers of hogs destined for sale or slaughter before April 15.

The numbers of hogs and pigs thus to be considered in connection with the change in the date of enumeration are relatively much greater than the numbers of any of the other kinds of animals, and for this reason, it is more difficult to arrive at a satisfactory approximation of the actual increase. The number of spring pigs included in the census of 1910 was probably more than one-half of the annual "crop" of pigs, and there is no doubt but that the number of young pigs gained by the lateness of the enumeration in 1910 considerably exceeds the number of hogs destined for sale or slaughter during the first 3½ months of the year, which were gained by the early enumeration in 1920. It is evident, then, that the number of swine reported for 1910 is too large for a fair comparison with the number reported for 1920—as much too large as the number of pigs born between January 1 and April 15 exceeds the number of hogs sold or slaughtered during the same period. The figures as reported for the two censuses show an increase of 1,160,733, or 2 per cent, between 1910 and 1920. It is evident, however, that the actual increase in the number of swine was much greater than this, though it is difficult to find a satisfactory basis for even an estimate as to how much greater.

TABLE 21.—SWINE ON FARMS: 1920 AND 1910.

[Figures for divisions and states in Table 66.]

CLASS.	Number.
Swine on farms Jan. 1, 1920, total	**59,346,409**
Pigs under 6 months old	26,172,239
Sows and gilts for breeding, 6 months old and over	11,416,471
Boars for breeding, 6 months old and over	925,340
All other hogs, 6 months old and over	20,827,938
Unclassified	4,421
Swine on farms Apr. 15, 1910	**58,185,676**
Spring pigs	23,051,579
Hogs and pigs born before Jan. 1, 1910	35,134,097

Poultry and bees on farms.—The total number of the different kinds of poultry on farms on January 1, 1920, amounted to 372,825,264, including 359,537,127 chickens and 13,288,137 other fowls. The total number of fowls on farms on April 15, 1910, was 295,880,190, including 280,340,959 chickens and 15,539,231 other fowls.

Taking the figures as they stand, they would indicate a marked increase in the number of chickens on farms. As a matter of fact, however, the earlier enumeration of the 1920 census is largely responsible for the greater number of chickens reported. Chickens are marketed and slaughtered to a considerable extent throughout the year, and an enumeration in January of a given year would include a large number of chickens which would be disposed of during the first 3½ months of the year and which would not, therefore, be counted in an enumeration made for the date April 15 of the same year. Since no chickens under 3 months of age were included in the census of 1910, there would be no additions on account of young chickens hatched between January and April to offset the sale and slaughter of the older fowls. The production of eggs shows an increase of about 5 per cent, and it would seem reasonable to assume that the actual increase in the number of chickens on farms was approximately the same.

TABLE 22.—POULTRY AND BEES ON FARMS: 1920 AND 1910.

[Figures for divisions and states in Tables 66 and 67.]

ITEM.	NUMBER.		VALUE.	
	1920 (Jan. 1)	1910 (Apr. 15)	1920 (Jan. 1)	1910 (Apr. 15)

	1910	3,029,795	2,915,125	114,670
Swine	1920	61,984,798	59,346,409	2,638,389
	1910	59,473,636	58,185,676	1,287,960

Domestic animals not on farms include those kept in village barns, in city stables, in lumber and mining camps, and elsewhere, including animals held in stockyards. The numbers of these animals, together with the numbers on farms and the combined total, are shown in Table 23.

Pure-bred live stock on farms.—Pure-bred live stock of some kind (either horses, cattle, sheep, or swine) was reported by 10.8 per cent of the farms in the United States in 1920. Of the total number of horses on farms 0.6 per cent were reported as pure-bred; of the cattle, 3 per cent; of the sheep, 1.3 per cent; and of the swine, 3.5 per cent.

TABLE 24.—PURE-BRED LIVE STOCK ON FARMS: 1920.

Jersey	231,834		
All other dairy breeds [1]	37,909		

[1] Includes animals reported as pure bred, with breed not specified.

LIVE-STOCK PRODUCTS.

Value of live-stock products.—The value of live-stock products produced on farms in the United States in 1919, not including domestic animals sold or slaughtered, was $2,667,072,273, as compared with $1,177,974,703 in 1909, representing an increase of $1,489,097,570, or 126.4 per cent. The total amount reported

for 1919 was distributed as follows: Dairy products, $1,481,462,091; eggs produced and chickens raised, $1,047,323,170; wool and mohair, $124,006,859; and honey and wax, $14,280,153.

The value of domestic animals sold and slaughtered in 1909 was $1,833,175,487. This item was not called for by the 1920 farm schedule, but the value for 1919 has been estimated at about $3,500,000,000.

TABLE 26.—VALUE OF LIVE-STOCK PRODUCTS OF FARMS: 1919 AND 1909.

[Not including the value of live stock sold or slaughtered. Figures for divisions and states in Table 74.]

ITEM.	1919	1909	INCREASE.	
			Amount.	Per cent.
Total	$2,667,072,273	$1,177,974,703	$1,489,097,570	126.4
Dairy products, total [1]	1,481,462,091	596,413,463	885,048,628	148.4
Butter made	346,355,759	222,861,440	123,494,319	55.4
Cheese made	2,268,025	1,148,708	1,119,317	97.4
Milk sold	717,380,222	252,436,757	464,943,465	184.2
Cream sold	111,905,929	37,655,047	74,250,882	197.2
Butter fat sold	303,552,156	82,311,511	221,240,645	268.8
Butter sold	106,973,742	100,378,123	6,595,619	6.6
Eggs and chickens, total [2]	1,047,323,170	509,195,232	538,127,938	105.7
Eggs produced (including estimates)	661,082,803	306,688,960	354,393,843	115.6
Chickens raised (including estimates)	386,240,367	202,506,272	183,734,095	90.7
Wool and mohair, total	124,006,859	66,373,925	57,632,934	86.8
Wool (including estimates)	120,417,549	65,472,328	54,945,221	83.9
Mohair	3,589,310	901,597	2,687,713	298.1
Honey and wax, total	14,280,153	5,992,083	8,288,070	138.3
Honey	13,988,670	5,762,869	8,225,801	142.7
Wax	291,483	229,214	62,269	27.2

[1] Value of milk, cream, and butter fat sold, and butter and cheese made on farms.
[2] The 1919 figures represent the value of chicken eggs and chickens only, while the 1909 figures include the value of the products of all kinds of poultry. The estimated value of chicken eggs alone for 1909 was $303,296,012, and of chickens raised, $184,902,527.

Quantities of live-stock products.—Certain items in Table 27, which gives the quantities of the different live-stock products for 1919 and 1909, call for a word of comment. In connection with four of the products shown in this table, estimates have been made for certain classes of incomplete reports. For example, the figures representing the "total production of milk, including estimates," include not only the quantities of milk actually reported on the farm schedules but also an estimate for the milk production of those farmers who reported dairy cows on hand on the census date but failed to report any milk production for the preceding calendar year. These estimates were based on the average production per dairy cow, as shown by the complete reports. In the same way estimates were made for the production of eggs and the number of chickens raised on farms for which the schedule showed chickens on hand but no products, and for the wool production on farms which reported sheep on hand but no wool. The data obtained in 1920 for goats kept for fleeces did not furnish a satisfactory basis for any estimates of mohair production, but it is believed that the mohair figures, as reported, are relatively complete.

While the value of eggs produced and chickens raised in 1909, as shown in Table 24, includes the value of the products of all kinds of poultry, the number of eggs produced in 1909 and the number of chickens raised, as shown in Table 25, have been reduced to a basis comparable with the returns for 1919; that is, the number of eggs other than chicken eggs has been estimated and deducted from the 1909 total, and likewise the number of fowls raised, other than chickens, has been estimated and deducted.

TABLE 27.—QUANTITIES OF LIVE-STOCK PRODUCTS OF FARMS: 1919 AND 1909.

[Figures for divisions and states in Tables 75, 76, and 77.]

ITEM.	1919	1909	INCREASE. [1]	
			Amount.	Per cent.
Dairy products:

Wax.....pounds..	820,529	904,867	−84,338	−9.3

[1] A minus sign (−) denotes decrease.
[2] Estimates have been made for incomplete reports (as where a farmer reported dairy cows but no milk production or chickens but no egg production) on the basis of the average production per cow, per chicken, etc., as shown by the complete reports.
[3] Figures for chicken eggs obtained by deducting from the 1909 total, as published, an estimate of the quantity of eggs other than chicken eggs which were included at the Thirteenth Census; figures for chickens raised obtained in a similar way.

Calves, pigs, and lambs raised on farms.—The number of farms reporting calves raised in 1919 was 4,073,156; pigs raised, 3,162,993; and lambs raised, 373,799. The numbers of young animals raised were as follows: Calves, 21,133,385, or an average of 5.2 per farm reporting calves raised; pigs, 62,072,829, or an average of 19.6 per farm reporting; and lambs, 13,653,130, or an average of 36.5 per farm reporting.

TABLE 28.—CALVES, PIGS, AND LAMBS RAISED ON FARMS: 1919.

[Figures for divisions and states in Table 78.]

ITEM.	Farms reporting.	Number.	Average per farm.
Calves	4,073,156	21,133,385	5.2
Pigs	3,162,993	62,072,829	19.6
Lambs	373,799	13,653,130	36.5

Domestic animals slaughtered on farms.—The number of cattle and calves slaughtered on farms in the United States in 1919 for food was 1,904,581; of hogs and pigs, 16,800,230; and of sheep and lambs, 434,608.

The sales of meat and meat products in 1919 were as follows: Beef and veal, 224,780,189 pounds; pork, 443,538,071 pounds; and lamb and mutton, 6,734,772 pounds.

TABLE 29.—DOMESTIC ANIMALS SLAUGHTERED ON FARMS, 1919 AND 1909; AND MEAT AND MEAT PRODUCTS SOLD, 1919.

[Figures for divisions and states in Table 79.]

ITEM.	1919	1909
Cattle and calves slaughtered:

Number slaughtered	1,904,581	2,540,240
Hogs and pigs slaughtered:		
Farms reporting	4,565,130	3,643,546
Number slaughtered	16,800,230	15,378,517
Sheep and lambs slaughtered:		
Farms reporting	93,853	69,299
Number slaughtered	434,808	529,526
Meat and meat products sold:		
Beef and veal, pounds	224,780,189	
Pork, pounds	443,538,071	
Lamb and mutton, pounds	6,734,772	

CROPS AND MISCELLANEOUS PRODUCTS.

Value of crops.—The total value of farm crops harvested in 1919 (excluding forest products and nursery and greenhouse products) was $14,755,364,894, as against $5,231,850,683 in 1909. These figures represent an increase of $9,523,514,211, or 182 per cent, for the decade. This enormous increase in the value of farm crops is due mainly, however, to the fact that the prices of crops were unusually high in the year 1919. A tabulation of the quantities of all the important crops harvested in 1919, with values computed on the basis of 1909 prices, indicates an increase of 9 per cent. So much of the increase in value, therefore, may be attributed to increased production and the remainder to higher prices.

TABLE 30.—VALUE OF FARM CROPS: 1919 AND 1909.

[Figures for divisions and states in Table 80.]

CROP.	1919	1909	INCREASE. Amount.	INCREASE. Per cent.
Total	$14,755,364,894	$5,231,850,683	$9,523,514,211	182.0
Cereals, total	6,941,257,254	2,665,539,714	4,275,717,540	160.4
Corn	3,507,797,102	1,438,553,919	2,069,243,183	143.8
Wheat	2,074,078,801	657,656,801	1,416,422,000	215.4
Oats	855,255,468	414,697,422	440,558,046	106.2
Other cereals	504,125,883	154,631,572	349,494,311	226.0
Hay and forage, total, including corn cut for forage [1]	2,523,050,224			
Hay and forage, excluding corn cut for forage	2,316,115,574	826,401,175	1,489,714,399	180.3
Vegetables, total	1,302,199,688	418,110,154	884,089,534	211.4
Potatoes (white)	639,440,521	166,423,910	473,016,611	284.2
Sweet potatoes and yams	124,844,475	35,429,176	89,415,299	252.4
Other vegetables [2]	537,914,692	216,257,068	321,657,624	148.7
Tobacco	444,047,481	104,302,856	339,744,625	325.7
Cotton (including cottonseed)	2,355,169,365	824,696,287	1,530,473,078	185.6
All other crops	1,189,640,882	392,800,497	796,840,385	202.9

[1] Corn cut for forage was not reported to any extent in 1909; for comparison with that year, therefore, the 1919 figure for hay and forage, excluding this crop, should be used.
[2] The 1919 figures represent the value of vegetables raised for sale plus the value of the products of the farm garden.

Acreage and production of principal crops.—Table 31 shows the acreage and production of the principal farm crops harvested in 1919 and 1909. Two sets of hay and forage totals are given for 1919, one including corn cut for forage, and one, for comparison with 1909, excluding this crop, which was not reported to any extent in 1909. The figures given for the other crops require no comment.

TABLE 31.—ACREAGE AND PRODUCTION OF PRINCIPAL CROPS: 1919 AND 1909.

[Figures for divisions and states in the following tables: Corn, wheat, and oats, Table 81; barley, rye, and buckwheat, Table 82; rice, Table 88; hay and forage, Table 83; potatoes and sweet potatoes, Table 84; tobacco, Table 85; cotton, Table 86; and peanuts, Table 84.]

Cottonseed (est.), tons	5,327,721	5,324,622	3,099	0.1
Peanuts, acres	1,125,100	869,887	255,213	29.3
Peanuts, bushels	27,449,930	19,415,816	8,034,114	41.4

[1] A minus sign (−) denotes decrease.
[2] Corn cut for forage was not reported to any extent in 1909; for comparison with that year, therefore, the 1919 figures for hay and forage, excluding this crop, should be used.

Vegetables raised for sale.—The total acreage of vegetables raised for sale on farms in the United States in 1919 was 1,475,274, and the total value was $193,248,964. These figures do not include potatoes or sweet potatoes, which are considered with the major crops. In addition to the vegetables raised for sale, vegetables raised primarily for home use, in the farm garden, were reported with an aggregate value of $344,665,728.

TABLE 32.—ACREAGE AND VALUE OF VEGETABLES RAISED FOR SALE: 1919.

[Vegetables other than potatoes and sweet potatoes. Figures for divisions and states in Table 92.]

VEGETABLE.	Acreage.	Value of product.
Total	1,475,274	$193,248,964
Asparagus	30,244	5,102,135
Beans (green)	71,970	8,031,449
Cabbages	123,994	21,848,112
Cantaloupes and muskmelons	78,436	10,766,591
Celery	20,148	9,462,277
Corn (sweet)	271,584	17,297,561

Tomatoes	316,399	38,675,496
Watermelons	159,088	10,466,133
All other vegetables	152,173	24,216,938

Sugar crops.—The production of sugar cane on farms in the United States in 1919 was 3,544,679 tons; of sugar beets, 5,993,409 tons; of sorghum grown for sirup, 1,644,100 tons, from which 21,523,025 gallons of sirup were made; of maple sugar, 9,691,854 pounds; and of maple sirup, 3,507,745 gallons.

TABLE 33.—SUGAR CROPS: 1919 AND 1909.

[Figures for states in Tables 87, 89, 90, and 91.]

ITEM.	1919	1909
Sugar cane:		
Acres	372,938	476,849
Production, tons	3,544,679	6,240,260
Sirup made on farms, gallons	21,240,960	21,633,579
Sugar beets grown for sugar:		
Acres	636,434	360,433
Production, tons	5,993,409	3,902,071
Sorghum grown for sirup:		
Acres	482,043	326,352
Production, tons	1,644,100	1,376,487
Sirup made, gallons	21,523,025	16,532,382
Maple sugar and sirup:		
Trees tapped	17,457,144	18,899,533
Sugar made, pounds	9,691,854	14,024,206
Sirup made, gallons	3,507,745	4,106,418

Small fruits.—The total acreage of small fruits harvested in the United States in 1919 was 249,084, as compared with 272,460 in 1909.

TABLE 34.—SMALL FRUITS: 1919 AND 1909.

[Figures for divisions and states in Table 93.]

ITEM.	ACREAGE.		PRODUCTION (QUARTS).	
	1919	1909	1919	1909
Total	249,084	272,460	324,988,968	426,565,863
Strawberries	119,395	143,045	176,931,550	255,702,035

Grapes.—The number of grape vines of bearing age in 1920 was 225,754,285, and the number of vines not of bearing age was 27,394,469. The production of grapes in 1919 was 2,516,840,387 pounds, as compared with 2,265,065,205 pounds in 1909.

TABLE 36.—GRAPES: 1919 AND 1909.

[Figures for divisions and states in Table 96.]

ITEM.		Number or quantity.
Production (pounds)	1919	2,516,840,387
	1909	2,265,065,205
Vines of bearing age	1920	225,754,285
	1910	223,601,522
Vines not of bearing age	1920	27,394,469
	1910	52,698,644

Sales of selected crops.—Of the total production of corn in the United States in 1919, 19.7 per cent was reported as sold in 1919, or to be sold at a later date, by the farmers who produced the corn; of the production of oats, 26.3 per cent was reported as sold; of barley, 36.8 per cent; of hay, 14.5 per cent; of potatoes, 58.4 per cent; and of apples, 72.2 per cent.

TABLE 37.—PRODUCTION AND SALES OF SELECTED CROPS: 1919 AND 1909.

[Figures for sales of corn, oats, and barley, by divisions and states in Table 97; for sales of hay, potatoes, and apples in Table 98.]

Fruit products of farms.—The number of gallons of cider made on farms in 1919 was 13,365,805, as compared with 32,583,998 in 1909. The number of gallons of cider made into vinegar in 1919, or to be made into vinegar, was 6,470,060, while the quantity of vinegar made on farms in 1909 (including some vinegar other than cider vinegar) was 7,246,632 gallons. The quantity of grape juice made on farms in 1919 was 2,202,848 gallons. There is no comparison between this quantity and the quantity of wine and grape juice (18,636,225 gallons) which was reported for 1909.

The total production of dried fruits in 1919 was 612,700,626 pounds, as compared with 385,039,552 pounds in 1909. The total for 1919 included 301,035,519 pounds of raisins and dried grapes, of which all except 35,288 pounds were produced in California.

TABLE 38.—FRUIT PRODUCTS OF FARMS: 1919 AND 1909.

[Figures for divisions and states in Table 99.]

Other dried fruits.....pounds..	311,665,107	.....

[1] Vinegar made on farms. [2] Wine and grape juice.

Forest products of farms.—The value of forest products of farms in the United States in 1919 was $394,321,828, as compared with $195,306,283 in 1909. These forest products include firewood, fence posts, crossties, pulp wood, saw logs, poles, bark, turpentine and rosin, etc. The figures cover only forest products of farms and do not represent the total value of all forest products cut during the census year. The area in merchantable timber on farms in 1920 was 35,270,527 acres.

Value of products sold.....	$217,716,046	$92,524,205
Value of products used on farms.....	$176,605,782	$102,782,078

Nursery and greenhouse products.—The number of acres reported as used for growing nursery products in 1919 was 51,453, and the receipts reported from the sale of nursery products were $20,434,389.

The total number of square feet reported under glass in greenhouses, hothouses, or similar commercial establishments on January 1, 1920, was 162,368,593. This includes the area covered by sashes and frames. The receipts reported from sales of greenhouse products in 1919 were $77,380,230, including $61,892,352 from the sale of flowers and flowering plants, and $15,487,878 from the sale of vegetables and vegetable plants.

TABLES FOR GEOGRAPHIC DIVISIONS AND STATES.

In Tables 41 to 101, inclusive, the major part of the data which have been summarized in Tables 1 to 40 above, are presented by geographic divisions and states. In some instances minor items have been omitted altogether by reason of the limitations of space, and in a few cases the comparative figures for 1910 have been omitted. Where the 1910 figures have been given for the United States in the summary table, however, they can be found for divisions and states in the reports of the Thirteenth Census. Whatever general comment has been made with regard to the figures for the United States as a whole will apply also to the figures for divisions and states.

TABLE 41.—RURAL AND URBAN POPULATION, BY DIVISIONS AND STATES: 1920 AND 1910.

[Rural population is defined as that residing outside of incorporated places having 2,500 inhabitants or over. Towns in New Hampshire, Massachusetts, and Rhode Island were included with incorporated places in making this classification.]

TABLE 58.—FARM-MORTGAGE DEBT, BY DIVISIONS AND STATES: 1920 AND 1910.

[Figures relate only to farms wholly owned by their operators and reporting amount of debt. Farms whose operators hire additional land are not included.]

DIVISION AND STATE.	NUMBER OF FARMS REPORTING AMOUNT OF MORTGAGE DEBT.		VALUE OF FARMS REPORTING MORTGAGE DEBT (LAND AND BUILDINGS).		AMOUNT OF MORTGAGE DEBT.		RATIO OF DEBT TO VALUE, PER CENT.		Average interest rate, 1920, per cent.	AVERAGE VALUE PER FARM.		AVERAGE DEBT PER FARM.	
	1920	1910	1920	1910	1920	1910	1920	1910		1920	1910	1920	1910

[1] The products shown for 1919 include chicken eggs and chickens only, while the 1909 figures include the products of all kinds of poultry. The figures represent the value of the total production of eggs and chickens, including estimates for farms reporting chickens on hand but no eggs or no chickens raised.

[2] The figures represent the value of the total production of wool, including estimates for farms reporting sheep on hand but no wool, plus the value of mohair, as reported.

TABLE 75.—DAIRY PRODUCTS OF FARMS, BY DIVISIONS AND STATES: 1919 AND 1909.

DIVISION AND STATE.	MILK PRODUCED.		MILK SOLD (GALLONS).		CREAM SOLD (GALLONS).		BUTTER FAT SOLD (POUNDS).		BUTTER MADE ON FARMS (POUNDS).		BUTTER SOLD (POUNDS).	
	Quantity, including estimates, 1919 [1] (gallons).	Per ct. of increase, 1909–1919. [2]	1919	1909	1919	1909	1919	1909	1919	1909	1919	1909

[1] Figures include estimates for farms which reported dairy cows on hand but failed to report any milk production.
[2] Percentages based on milk produced, as reported, rather than on the estimated totals, by reason of the fact that the 1909 estimates appear to have been somewhat too large to provide a fair basis of comparison. A minus sign (−) denotes decrease.

TABLE 76.—WOOL AND MOHAIR, AND HONEY AND WAX, BY DIVISIONS AND STATES: 1919 AND 1909.

DIVISION AND STATE.	WOOL PRODUCED, INCLUDING ESTIMATES (POUNDS).[1]		MOHAIR PRODUCED, AS REPORTED (POUNDS).		HONEY PRODUCED (POUNDS).		WAX PRODUCED (POUNDS).

[1] The figures for both 1919 and 1909 include estimates for farms reporting chickens on hand but no eggs produced. The returns for 1909 included all eggs produced. To obtain figures for chicken eggs alone, the quantity of eggs of other kinds has been estimated and deducted.

[2] The figures for both 1919 and 1909 include estimates for farms reporting chickens on hand on the census date but no chickens raised during the preceding year. The returns for 1909 included all kinds of fowls raised. To obtain figures for chickens raised, the number of other fowls raised has been estimated and deducted.

[3] Chickens 3 months old and over.

SUMMARY FOR THE NORTH, THE SOUTH, AND THE WEST.

This brief summary of the main items of the 1920 farm census presents totals for the three great sections into which the country may conveniently be divided, namely, the North, the South, and the West. For explanation of terms and other supplementary matter reference may be made to the introduction to this volume, pages 11 to 14.

The geographic divisions and states which make up each of the three sections for which totals are presented herewith are given below, and the sections are shown on the accompanying map. Figures for these geographic divisions and states may be found in the detailed tables of the Summary for the United States, on pages 30 to 84.

THE NORTH.

New England Division.

Maine.
New Hampshire.
Vermont.
Massachusetts.
Rhode Island.
Connecticut.

Middle Atlantic Division.

New York.
New Jersey.
Pennsylvania.

East North Central Division.

Ohio.
Indiana.
Illinois.
Michigan.
Wisconsin.

West North Central Division.

Minnesota.
Iowa.
Missouri.
North Dakota.
South Dakota.
Nebraska.
Kansas.

THE SOUTH.

South Atlantic Division.

Delaware.
Maryland.
District of Columbia.
Virginia.
West Virginia.
North Carolina.
South Carolina.
Georgia.
Florida.

East South Central Division.

Kentucky.
Tennessee.
Alabama.
Mississippi.

West South Central Division.

Arkansas.
Louisiana.
Oklahoma.
Texas.

THE WEST.

Mountain Division.

Montana.
Idaho.
Wyoming.
Colorado.
New Mexico.
Arizona.
Utah.
Nevada.

Pacific Division.

Washington.
Oregon.
California.

MAP OF THE UNITED STATES, SHOWING SECTIONS.

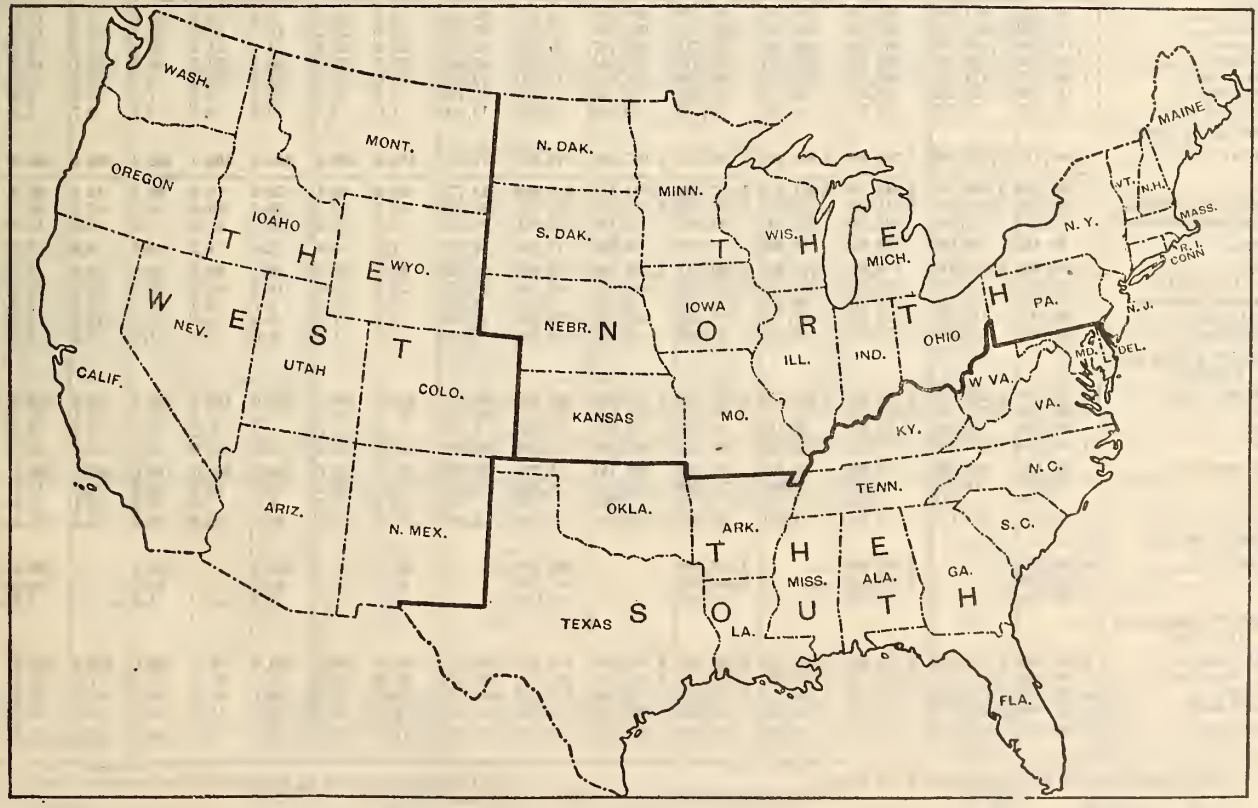

TABLE 1.—POPULATION, FARMS, AND FARM PROPERTY—SUMMARY, BY SECTIONS: 1920 AND 1910.

SECTION AND ITEM.	1920	1910	INCREASE.[1] Amount.	INCREASE.[1] Per cent.
TOTAL POPULATION.				
United States	105,710,620	91,972,266	13,738,354	14.9
The North	63,681,845	55,757,115	7,924,730	14.2
The South	33,125,803	29,389,330	3,736,473	12.7
The West	8,902,972	6,825,821	2,077,151	30.4
RURAL POPULATION.				
United States	51,406,017	49,806,146	1,599,871	3.2
The North	23,367,533	23,544,673	−177,140	−0.8
The South	23,821,975	22,765,492	1,056,483	4.6
The West	4,216,509	3,495,981	720,528	20.6
NUMBER OF FARMS.				
United States	6,448,343	6,361,502	86,841	1.4
The North	2,763,406	2,890,618	−127,212	−4.4
The South	3,206,664	3,097,547	109,117	3.5
The West	478,273	373,337	104,936	28.1
ALL LAND IN FARMS.				
United States...acres	955,883,715	878,798,325	77,085,390	8.8
The North.....acres	432,271,951	413,483,256	18,788,695	4.5
The South.....acres	350,121,833	354,452,860	−4,331,027	−1.2
The West.....acres	173,489,931	110,862,209	62,627,722	56.5
IMPROVED LAND IN FARMS.				
United States...acres	503,073,007	478,451,750	24,621,257	5.1
The North.....acres	291,965,982	289,807,888	2,158,094	0.7
The South.....acres	157,079,624	150,690,852	6,388,772	4.2
The West.....acres	54,027,401	37,953,010	16,074,391	42.4
VALUE OF ALL FARM PROPERTY.				
United States	$77,924,100,338	$40,991,449,090	$36,932,651,248	90.1
The North	50,359,500,915	27,481,267,056	22,878,233,859	83.3
The South	18,174,450,024	8,972,126,889	9,202,323,135	102.6
The West	9,390,149,399	4,538,055,145	4,852,094,254	106.9
VALUE OF FARM LAND AND BUILDINGS.				
United States	66,316,002,602	34,801,125,697	31,514,876,905	90.6
The North	43,326,743,178	23,650,151,375	19,676,591,803	83.2
The South	15,156,654,907	7,353,431,195	7,803,223,712	106.1
The West	7,832,604,517	3,797,543,127	4,035,061,390	106.3
VALUE OF FARM IMPLEMENTS AND MACHINERY.				
United States	3,594,772,928	1,265,149,783	2,329,623,145	184.1
The North	2,400,554,930	856,021,304	1,544,533,626	180.4
The South	771,144,533	293,289,857	477,854,676	162.9
The West	423,073,465	115,838,622	307,234,843	265.2
VALUE OF LIVE STOCK ON FARMS.				
United States	8,013,324,808	4,925,173,610	3,088,151,198	62.7
The North	4,632,202,807	2,975,094,377	1,657,108,430	55.7
The South	2,246,650,584	1,325,405,837	921,244,747	69.5
The West	1,134,471,417	624,673,396	509,798,021	81.6

[1] A minus sign (−) denotes decrease.

TABLE 2.—NUMBER OF FARMS, BY SIZE, BY TENURE, AND BY COLOR, SEX, AND NATIVITY OF FARMER, BY SECTIONS: 1920 AND 1910.

ITEM.	NUMBER OF FARMS. UNITED STATES. 1920	UNITED STATES. 1910	THE NORTH. 1920	THE NORTH. 1910	THE SOUTH. 1920	THE SOUTH. 1910	THE WEST. 1920	THE WEST. 1910
FARMS BY SIZE.

[1] Value of milk, cream, and butter fat sold, and of butter and cheese made on farms.

[2] Estimates have been made for incomplete reports, as where a farmer reported dairy cows but no milk production, or chickens but no egg production. Chicken eggs and chickens for 1909 also involve estimated deductions from the published figures of the Thirteenth Census, which included all eggs and all kinds of fowls raised.

[3] Value of all eggs produced. The estimated value of chicken eggs produced in 1909 in the United States was $303,296,012; in the North, $203,173,243; in the South, $74,299,535; and in the West, $25,823,234.

[4] Value of all fowls raised. The estimated value of chickens raised in 1909 in the United States was $184,902,527; in the North, $120,491,785; in the South, $53,397,425; and in the West, $11,013,317.

[1] Corn cut for forage was not reported to any extent in 1909; for comparison with that year, therefore, the 1919 figures for hay and forage, excluding this crop, should be used.

[2] The 1919 figures represent the value of vegetables raised for sale plus the value of the products of the farm garden.

DELAWARE.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Delaware collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	223,003	202,322	20,681	10.2
Rural [2]	102,236	105,237	−3,001	−2.9
Urban	120,767	97,085	23,682	24.4
Per cent rural	45.8	52.0		
Number of farms	10,140	10,836	−696	−6.4
Approximate land area of the state—acres	1,257,600	1,257,600		
All land in farms—acres	944,511	1,038,866	−94,355	−9.1
Improved land in farms—acres	653,052	713,538	−60,486	−8.5
Woodland in farms—acres	222,658	252,032	−29,374	−11.7
Other unimproved land in farms—acres	68,801	73,296	−4,495	−6.1
Per cent of land area in farms	75.1	82.6		
Per cent of farm land improved	69.1	68.7		
Average acreage per farm	93.1	95.9	−2.8	−2.9
Average improved acreage per farm	64.4	65.8	−1.4	−2.1
Value of all farm property	$80,137,614	$63,179,201	$16,958,413	26.8
Land and buildings	64,755,631	53,155,983	11,599,648	21.8
Land alone	42,115,802	34,938,161	7,177,641	20.5
Buildings	22,639,829	18,217,822	4,422,007	24.3
Implements and machinery	6,781,318	3,206,095	3,575,223	111.5
Live stock	8,600,665	6,817,123	1,783,542	26.2
Average value per farm:				
All farm property	7,903	5,830	2,073	35.6
Land and buildings	6,386	4,905	1,481	30.2
Land alone	4,153	3,224	929	28.8

Live stock	9.11	6.56	2.55	38.9

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase (or decrease) in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 105,237. For this territory, the population shows a decrease between 1910 and 1920 amounting to 2.9 per cent, which percentage indicates the rate of decline in the rural population, leaving out of consideration the changes in classification of territory.

COUNTIES, PRINCIPAL CITIES, AND RIVERS

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered only a close approximation.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	6,010	6,178	−168	−2.7	100.0	100.0
Free from mortgage	3,504	3,817	−313	−8.2	58.3	61.8
Mortgaged	2,018	2,264	−246	−10.9	33.6	36.6
Unknown	488	97	391	.....	8.1	1.6

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	6,010	6,178	4,716	4,745	100.0	100.0	100.0	100.0
Free from mortgage	3,504	3,817	2,803	3,350	58.3	61.8	59.4	70.6
Mortgaged	2,018	2,264	1,611	1,395	33.6	36.6	34.2	29.4
Unknown	488	97	302	.....	8.1	1.6	6.4	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.[2]	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	1,903	2,021	−118	−5.8
Value of land and buildings	$11,422,387	$8,801,976	$2,620,411	29.8
Amount of mortgage debt	$4,460,416	$3,068,721	$1,391,695	45.4
Ratio of debt to value..per cent..	39.0	34.9	.....	.....
Average rate of interest paid..per cent..	5.7	.....	.....	.....
Average value per farm	$6,002	$4,355	$1,647	37.8
Average debt per farm	$2,344	$1,518	$826	54.4
Average equity per farm	$3,658	$2,837	$821	28.9

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

[2] A minus sign (−) denotes decrease.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	5,394	6,841	−1,447	−21.2	53.2	63.1
Fertilizer	9,107	9,023	84	0.9	89.8	83.3
Feed	6,405	3,461	2,944	85.1	63.2	31.9

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$2,807,879	$1,612,471	$1,195,408	74.1
Amount in cash	2,052,218	1,257,198	795,020	63.2
Value of rent and board furnished	755,661	355,273	400,388	112.7
Fertilizer	1,222,329	864,577	357,752	41.4
Feed	1,490,252	337,841	1,152,411	341.1

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1, and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration there have been certain changes in the age and sex classifications. The 1910 figures presented in this bulletin are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production, the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows; and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Delaware the number of "dairy cows," including heifers 1 year old and over, reported for January 1,

1920, was 37,878, as compared with 35,708 "cows kept for milk" reported for April 15, 1910. This represents an increase of 2,170, or 6.1 per cent, notwithstanding the change in classification indicated above. The number of "beef cows" reported for January 1, 1920, was 911, as compared with 3,497 "other cows" reported for April 15, 1910, representing a decrease of 2,586, or 73.9 per cent.

Farms reporting domestic animals: 1910.—Horses were reported by 9,857 farms in Delaware in 1910; mules by 2,722 farms; cattle by 8,498; sheep by 266; and swine by 7,926. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Delaware decreased from 10,836 in 1910 to 10,140 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates, or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk," but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms, Jan. 1, 1920, total	7,521	74.2	33,026	Head

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms. Data for these items will be tabulated later.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Delaware in 1919 for which the acreage was reported was 448,227, which represents 68.6 per cent of the total improved land in farms (653,052 acres). The total crop acreage reported for 1909, was 438,296, or 61.4 per cent of the improved land in farms (713,538 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 515 acres of mature crops grazed or "hogged off."

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the products of the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

Small fruits	2,322		22.9		3,915	8,687	−54.9	Qts.	4,362,473	14,425,209	−69.8	783,567	649,732	20.6
Other fruits and nuts												1,783,240	[12] 240,704	640.8

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.

[2] Excluding 127,358 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

[3] Includes small quantities of emmer and spelt (1919 and 1909); and of kafir and milo (1909).

[4] Principally oats and cowpeas grown and harvested together.

[5] Includes a small quantity of peanuts.

[6] Includes small quantities of timothy seed (1919 and 1909), of millet seed (1909), and of flower and vegetable seeds (value only, 1909). The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.

[7] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed groups in which corn cut for forage appears.

[8] Includes millet and Hungarian grass.

[9] The 1919 figures represent vegetables raised for sale only.

[10] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

[11] These crops include broom corn (1919 and 1909), tobacco (1919), and hops (1909).

[12] Includes the value of a small quantity of figs, which are not shown in Table 39.

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	170,612	188,755	192,025	174,796	202,120
Oats	4,736	4,226	5,247	19,374	17,158
Wheat	125,740	111,215	118,740	94,368	87,539
Rye	6,198	1,017	1,103	775	773
Buckwheat	9,443	4,002	1,652	325	397
Hay and forage	[1] 201,365	80,673	74,800	76,199	42,688
Potatoes	8,255	9,703	5,755	4,870	
Sweet potatoes and yams	9,813	5,229	2,265	2,158	2,472

[1] Includes 127,358 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, in order to make the 1919 figures more closely comparable with those for earlier years, the remaining area in hay and forage will be 74,007 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

MARYLAND.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Maryland collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	1,449,661	1,295,346	154,315	11.9
Rural[2]	580,239	637,154	−56,915	−8.9
Urban	869,422	658,192	211,230	32.1
Per cent rural	40.0	49.2		
Number of farms	47,908	48,923	−1,015	−2.1
Approximate land area of the state.....acres	6,362,240	6,362,240		
All land in farms.....acres	4,757,999	5,057,140	−299,141	−5.9
Improved land in farms.....acres	3,136,728	3,354,767	−218,039	−6.5
Woodland in farms.....acres	1,327,221	1,467,333	−140,112	−9.5
Other unimproved land in farms.....acres	294,050	235,040	59,010	25.1
Per cent of land area in farms	74.8	79.5		
Per cent of farm land improved	65.9	66.3		
Average acreage per farm	99.3	103.4	−4.1	−4.0
Average improved acreage per farm	65.5	68.6	−3.1	−4.5

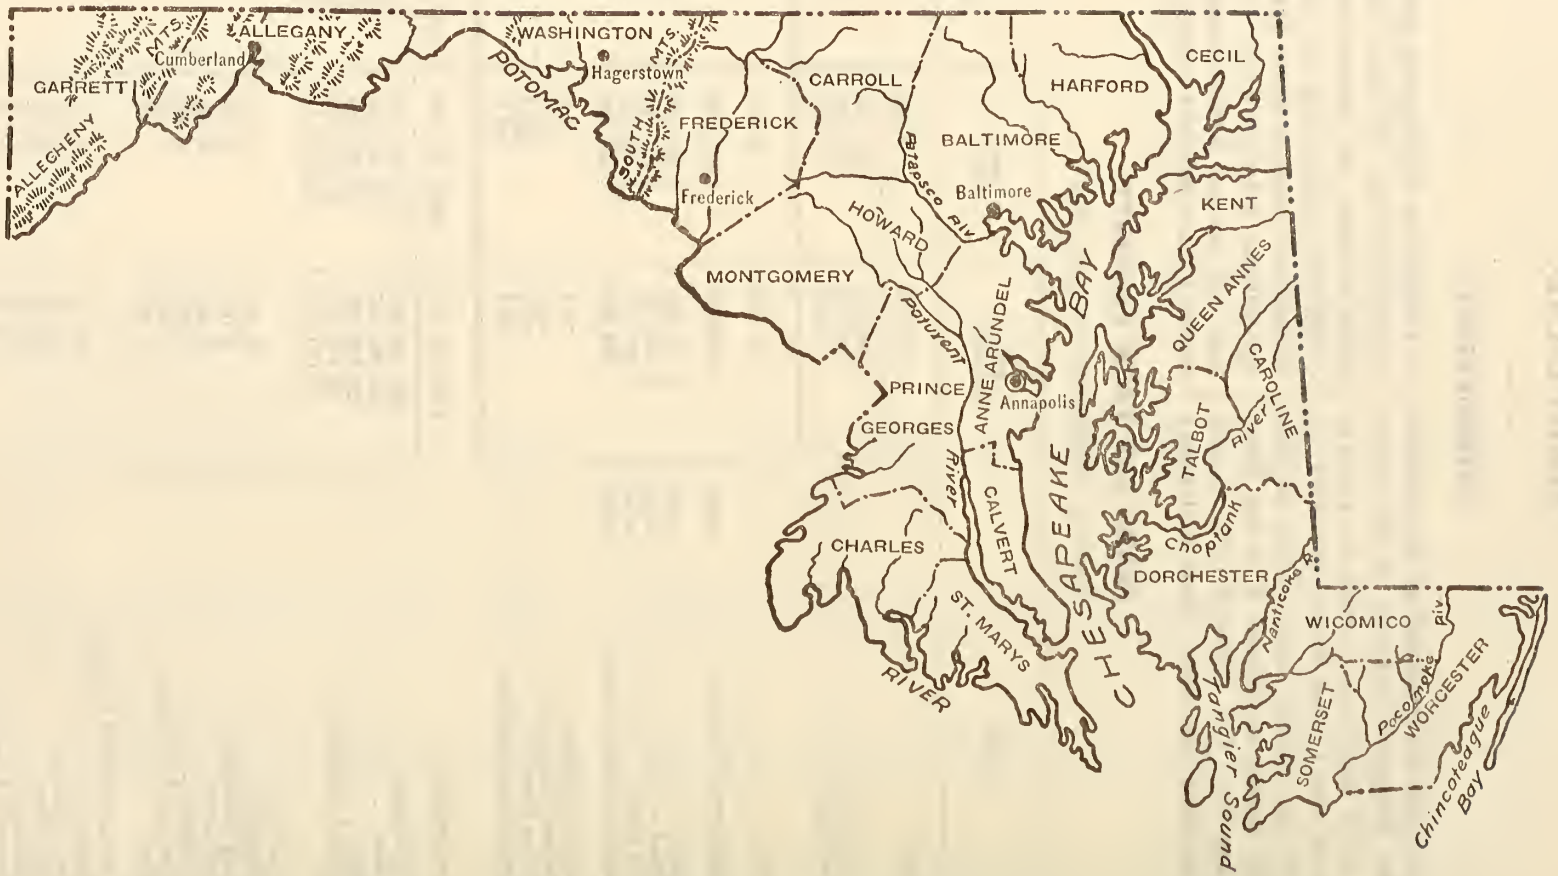
Live stock	10.10	6.44	3.66	56.8

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase (or decrease) in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 631,508. For this territory, the population shows a decrease between 1910 and 1920 amounting to 8.1 per cent, which percentage indicates the rate of decline in the rural population, leaving out of consideration the changes in classification of territory.

MARYLAND

COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920

Feed	33,353	23,198	10,155	43.8	69.6	47.4

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$16,721,294	$8,802,172	$7,919,122	90.0
Amount in cash	12,915,060	6,743,157	6,171,903	91.5
Value of rent and board furnished	3,806,234	2,059,015	1,747,219	84.9
Fertilizer	7,610,478	3,387,634	4,222,844	124.7
Feed	8,044,715	2,445,065	5,599,650	229.0

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Maryland, however, notwithstanding this change of classification, the number of dairy cows, including

heifers 1 year old and over, reported for January 1, 1920, namely, 188,537, shows an increase of 21,678, or 13 per cent, as compared with 166,859 cows reported as "kept for milk" on April 15, 1910. On the other hand, the 13,704 beef cows reported in 1920 represent a decrease of 5,112, or 27.2 per cent, as compared with 18,816 cows reported in 1910 as "not kept for milk."

Farms reporting domestic animals: 1910.—Horses were reported by 42,374 farms in Maryland in 1910, mules by 8,869 farms, cattle by 39,653, sheep by 6,228, and swine by 35,194. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Maryland decreased from 48,923 in 1910 to 47,908 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

CLASS.	FARMS REPORTING.		ANIMALS.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to the value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Maryland in 1919 for which the acreage was reported was 1,987,965, which represents 63.4 per cent of the total improved land in farms (3,136,728 acres). The total crop acreage reported for 1909 was 1,927,254, or 57.4 per cent of the improved land in farms (3,354,767 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 3,047 acres of mature crops grazed or "hogged off."

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
[2] Excluding 219,684 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] Includes small quantities of emmer and spelt, and kafir and milo.
[4] Principally oats and barley grown and harvested together.
[5] Less than one-tenth of 1 per cent.
[6] Includes a small quantity of flaxseed. A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.
[7] The total values include the value of small quantities of flower and vegetable seeds. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[9] Includes millet and Hungarian grass.
[10] The 1919 figures represent vegetables raised for sale only.
[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[12] These crops comprise cotton, hemp, hops, and willows.

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	619,265	647,012	658,010	586,817	664,928
Oats	48,891	49,210	44,625	99,195	101,127
Wheat	664,295	589,893	634,446	510,727	569,296
Hay and forage	[1] 622,939	398,892	374,848	372,626	259,511
Potatoes	46,837	39,299	26,472	24,987	
Tobacco	28,550	26,072	42,911	20,274	38,174

[1] Includes 219,684 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 403,255 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

DISTRICT OF COLUMBIA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for the District of Columbia collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850. In studying the agricultural statistics for the District of Columbia, especially the farm values, it should be borne in mind that the area is predominantly urban in character and that much of the farm land, therefore, has its chief value as potential residence property.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1] Amount.	INCREASE.[1] Per cent.
Population[2]	437,571	331,069	106,502	32.2

Average value per acre of land in farms:				
All farm property	1,045.87	1,398.08	−352.21	−25.2
Land and buildings	984.01	1,357.64	−373.63	−27.5
Land alone	733.27	1,186.53	−453.26	−38.2
Buildings	250.74	171.10	79.64	46.5
Implements and machinery	18.39	15.23	3.16	20.7
Live stock	43.47	25.21	18.26	72.4

[1] A minus sign (−) denotes decrease.

[2] Wholly urban.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920.

CENSUS YEAR.	FARMS.		LAND IN FARMS.				Per cent of land area in farms.	Per cent of farm land improved.

Negro	20	12	288	273	233,300

[1] Includes farmers with country of birth not reported, as follows: For 1920, 3; for 1910, 1.

FARM MORTGAGES.

TABLE 15.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

[The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than at the earlier censuses.]

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	100	118	144	242	100.0	100.0	100.0	100.0
Free from mortgage	53	93	116	232	53.0	78.8	80.6	95.9
Mortgaged	29	21	27	10	29.0	17.8	18.8	4.1
Unknown	18	4	1	.....	18.0	3.4	0.7	.....

TABLE 16.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.[2]	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	24	20	4	.....
Value of land and buildings	$237,900	$233,400	$4,500	1.9
Amount of mortgage debt	$92,900	$56,100	$36,800	65.6
Ratio of debt to value, per cent	39.1	24.0	.....	.....
Average rate of interest paid, per cent	5.8	.....	.....	.....
Average value per farm	$9,913	$11,670	−$1,757	−15.1
Average debt per farm	$3,871	$2,805	$1,066	38.0
Average equity per farm	$6,042	$8,865	−$2,823	−31.8

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures, it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

[2] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 17.—EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	FARMS REPORTING.		AMOUNT EXPENDED.		INCREASE.[1]	
	1919	1909	1919	1909	Amount.	Per cent.

Feed	153	183	170,758	130,077	40,681	31.3

[1] A minus sign (−) denotes decrease.

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept."

In the District of Columbia the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 799, as compared with 857 "cows kept for milk" reported for April 15, 1910. This represents a decrease of 58, or 6.8 per cent.

TABLE 18.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm; the 1909 values are therefore based directly on reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops harvested in 1919, which is described in a later paragraph.

TABLE 23.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING.		Number or quantity.	Unit.	Value.
	Number.	Per cent of all farms.			
Dairy cows on farms Jan. 1, 1920, total	94	46.1	704	Head	
On farms reporting milk produced	87	42.6	695	Head	
On farms not reporting milk produced	7	3.4	9	Head	
Average production of milk per dairy cow, 1919[1]			723	Gals.	
Specified dairy products:					
Milk, as reported...1919			505,567	Gals.	
1909			555,342	Gals.

Value of milk, cream, and butter fat sold, and of butter made[3]...1919					$81,484
1909					$117,335
Increase, 1909–1919[2]					−$35,851
Per cent of increase[2]					−30.6
Receipts from sale of dairy products...1919					$77,918
1909					$116,116
Increase, 1909–1919[2]					−$38,198
Per cent of increase[2]					−32.9

[1] Based on the 1919 milk production as reported for dairy cows, and the number of dairy cows on hand Jan. 1, 1920.
[2] A minus sign (−) denotes decrease.
[3] This item represents the total farm value of dairy products, excluding milk and cream consumed as such on the farm where produced.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. It may be safely assumed that the returns for butter made on farms, and for milk, cream, butter fat, and butter sold are more nearly complete than in the case of milk produced. Hence no estimates have been made for these items.

TABLE 24.—CHICKENS (OR FOWLS) ON FARMS, 1920 AND 1910; AND POULTRY PRODUCTS, 1919 AND 1909.

[The products shown for 1919 include chicken eggs and chickens only, while the 1909 figures include the products of all kinds of poultry.]

ITEM.	FARMS REPORTING.		Number or quantity.	Value.
	Number.	Per cent of all farms.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in the District of Columbia in 1919 for which the acreage was reported was 2,208, which represents 51.9 per cent of the total improved land in farms (4,258 acres).

The total crop acreage reported for 1909 was 2,742, or 53.4 per cent of the improved land in farms.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

TABLE 26.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING.				ACRES HARVESTED.			PRODUCTION.						
	Number.		Per cent of all farms.					Quantity.				Value.

Small fruits	28		13.7		21	12		Qts.	25,789	24,109	7.0	4,866	1,875	159.5
Other fruits and nuts												7,881	4,245	85.7

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100.

[2] Excluding 138 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

[3] The 1919 figures include a small quantity of buckwheat.

[4] Less than 1 acre.

[5] Corn cut for forage was not reported to any extent in 1909; hence no close comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.

[6] Includes millet and Hungarian grass.

[7] The 1919 figures represent vegetables raised for sale only.

[8] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 27.—ACREAGE OF IMPORTANT CROPS: 1879 TO 1919.

VIRGINIA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Virginia collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

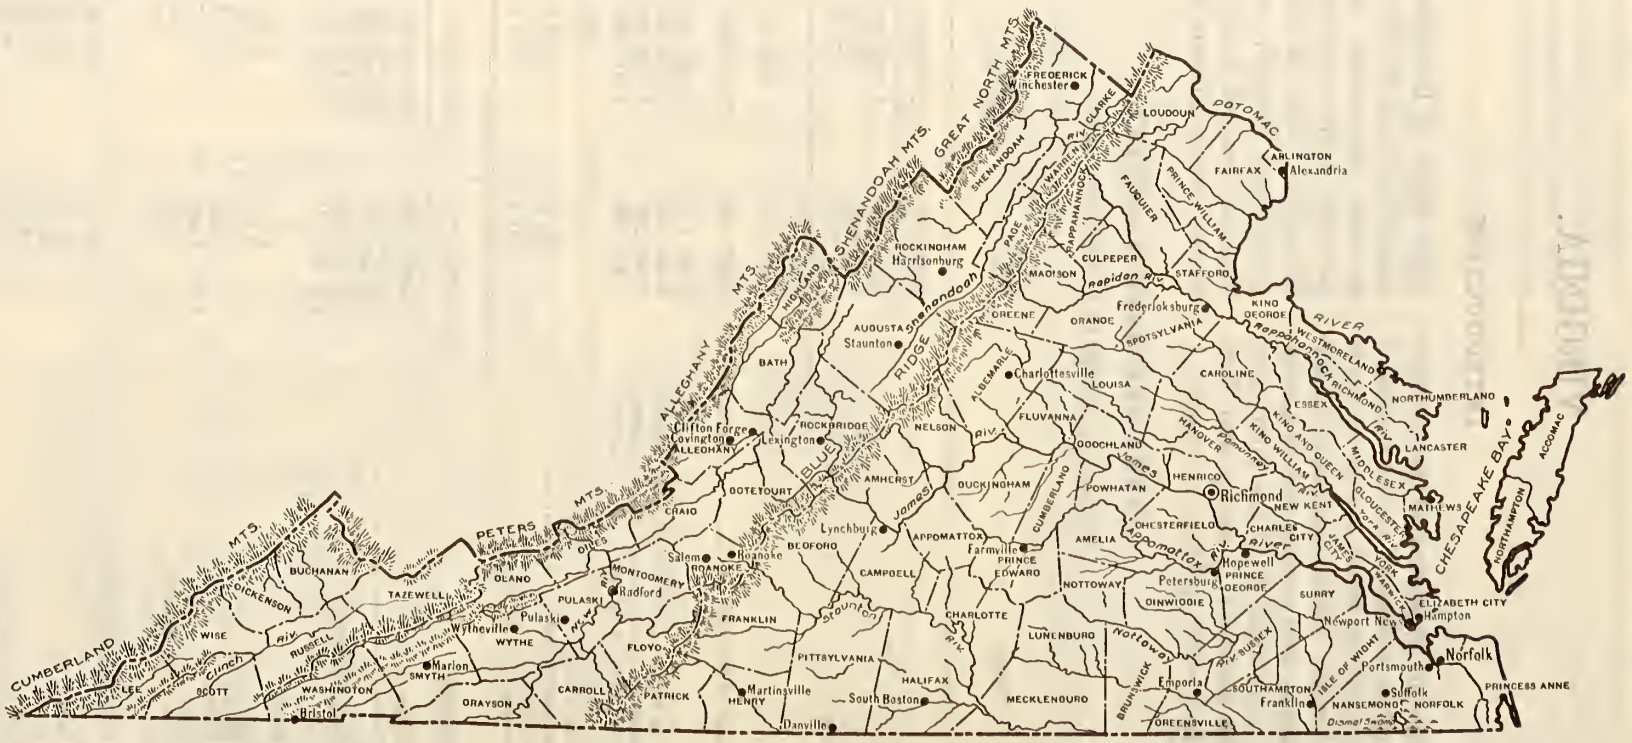
Implements and machinery	2.70	0.93	1.77	90.3
Live stock	6.57	3.84	2.73	71.1

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,565,344. For this territory, the increase in population between 1910 and 1920 was 4.5 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

VIRGINIA

Counties, Principal Cities, Rivers, and Mountains.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

[1] Includes farmers with country of birth not reported.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	136,363	133,664	2,699	2.0	100.0	100.0
Free from mortgage	98,470	111,474	−13,004	−11.7	72.2	83.4
Mortgaged	24,331	21,182	3,149	14.9	17.8	15.8
Unknown	13,562	1,008	12,554	.....	9.9	0.8

[1] A minus sign (−) denotes decrease. Per cent not shown when more than 1,000. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	136,363	133,664	115,815	82,256	100.0	100.0	100.0	100.0
Free from mortgage	98,470	111,474	94,688	79,660	72.2	83.4	81.8	96.8
Mortgaged	24,331	21,182	16,268	2,596	17.8	15.8	14.0	3.2
Unknown	13,562	1,008	4,859	.....	9.9	0.8	4.2	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	21,155	17,410	3,745	21.5
Value of land and buildings	$151,585,109	$62,377,247	$89,207,862	143.0
Amount of mortgage debt	$41,725,542	$15,440,291	$26,285,251	170.2
Ratio of debt to value, per cent	27.5	24.8	.....	.....
Average rate of interest paid, per cent.	5.9	.....	.....	.....
Average value per farm	$7,165	$3,583	$3,582	100.0
Average debt per farm	$1,972	$887	$1,085	122.3
Average equity per farm	$5,193	$2,696	$2,497	92.6

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures, it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909

Fertilizer	135,218	111,277	23,941	21.5	72.6	60.5
Feed	97,297	62,267	35,030	56.3	52.2	33.8

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$20,422,610	$13,354,194	$7,068,416	52.9
Amount in cash	17,002,779	10,822,816	6,179,963	57.1
Value of rent and board furnished	3,419,831	2,531,378	888,453	35.1
Fertilizer	17,277,705	6,932,455	10,345,250	149.2
Feed	12,400,193	3,504,660	8,895,533	253.8

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Virginia the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 417,719 as compared with 356,284 "cows

kept for milk" reported for April 15, 1910. This represents an increase of 61,435, or 17.2 per cent. The number of "beef cows" reported for January 1, 1920, was 102,410, as compared with 87,697 "cows not kept for milk" reported for April 15, 1910, representing an increase of 14,713, or 16.8 per cent. The percentage of increase shown for dairy cows would have been even larger, except for the change in classification mentioned above, and the percentage of increase shown for beef cows correspondingly smaller.

Farms reporting domestic animals: 1910.—Horses were reported by 127,758 farms in Virginia in 1910, mules by 30,688 farms, cattle by 153,772, sheep by 21,514, and swine by 140,176. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Virginia increased from 184,018 in 1910 to 186,242 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

CLASS.	FARMS REPORTING.		ANIMALS.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.

1909			23,883	5,956

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Virginia in 1919 for which the acreage was reported was 4,579,367, which represents 48.4 per cent of the total improved land in farms (9,460,492 acres). The total crop acreage reported for 1909 was 4,255,282, or 43.1 per cent of the improved land in farms (9,870,058 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 16,644 acres of mature crops grazed or "hogged off" and 96 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.

[2] Excluding 863,684 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

[3] The 1909 figures include a small quantity of kafir and milo.

[4] Less than one-tenth of 1 per cent.

[5] Principally oats and wheat and oats and rye grown and harvested together.

[6] Includes small quantities of sorghum seed (1919 and 1909) and of flaxseed and stock beans (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops is probably a duplication of other crop acreage.

[7] The 1909 value includes the value of a small quantity of flower and vegetable seeds. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.

[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.

[9] Includes millet and Hungarian grass.

[10] The 1919 figures represent vegetables raised for sale only.

[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

[12] These crops comprise ginseng (value only) and broom corn (1919 and 1909), and hemp and hops (1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	1,804,802	1,860,359	1,910,085	1,600,690	1,768,127
Oats	135,842	204,455	275,394	495,508	563,443
Wheat	990,506	692,907	927,266	737,510	901,177
Rye	57,018	47,890	31,534	52,063	48,746
Peanuts	133,162	145,213	116,914	58,962	.....
Hay and forage	[1] 1,773,650	773,755	612,962	604,857	336,289
Potatoes	105,789	86,927	51,021	36,412	.....
Sweet potatoes and yams	42,889	40,838	40,681	28,186	23,755
Tobacco	225,504	185,427	184,334	110,579	140,791
Cotton	47,032	25,147	25,724	39,213	45,040

[1] Includes 863,684 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 909,966 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

[1] Parts of Norfolk County annexed to Norfolk city in 1902, 1906, and 1911, and to Portsmouth city in 1909 and 1919.
[2] Parts of Henrico County annexed to Richmond city in 1906 and 1914; part of Chesterfield County annexed to Richmond city in 1914.
[3] Parts of Roanoke County annexed to Roanoke city in 1915 and 1919.
[4] Part of Augusta County annexed to Staunton city in 1905.
[5] Suffolk incorporated as a city from part of Nansemond County in 1910; part of Nansemond County annexed to Suffolk city in 1916.
[6] The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county (or city) where the operator resides, even though a part of the farm may be situated in an adjoining county.

WEST VIRGINIA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for West Virginia collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1870.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	1,463,701	1,221,119	242,582	19.9

Buildings	10.81	5.72	5.09	89.0
Implements and machinery	1.92	0.70	1.22	174.3
Live stock	7.03	4.32	2.71	62.7

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 962,055. For this territory, the increase in population between 1910 and 1920 was 13.8 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

[3] Less than one-tenth of 1 per cent decrease.

WEST VIRGINIA

COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

—*Farm owners* include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1870 TO 1920.

CENSUS YEAR.	FARMS.		LAND IN FARMS.				Per cent of land area in farms.	Per cent of farm land improved.
			All land.		Improved land.			
	Number.	Per cent of increase.[1]	Acres.	Per cent of increase.[1]	Acres.	Per cent of increase.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	72,101	75,978	−3,877	−5.1	100.0	100.0
Free from mortgage	52,617	66,093	−13,476	−20.4	73.0	87.0
Mortgaged	10,274	9,525	749	7.9	14.2	12.5
Unknown	9,210	360	8,850	.....	12.8	0.5

[1] A minus sign (−) denotes decrease. Per cent not shown when more than 1,000. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	72,101	75,978	70,949	56,035	100.0	100.0	100.0	100.0
Free from mortgage	52,617	66,093	58,633	48,763	73.0	87.0	82.6	87.0
Mortgaged	10,274	9,525	9,645	7,272	14.2	12.5	13.6	13.0
Unknown	9,210	360	2,671	.....	12.8	0.5	3.8	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	9,031	7,878	1,153	14.6
Value of land and buildings	$43,989,441	$21,549,125	$22,440,316	104.1
Amount of mortgage debt	$11,205,953	$5,592,533	$5,613,420	100.4
Ratio of debt to value, per cent	25.5	26.0	.....	.....
Average rate of interest paid, per cent	5.9	.....	.....	.....
Average value per farm	$4,871	$2,735	$2,136	78.1
Average debt per farm	$1,241	$710	$531	74.8
Average equity per farm	$3,630	$2,025	$1,605	79.3

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.

Fertilizer	1,709,546	528,937	1,180,609	223.2
Feed	5,639,713	1,938,233	3,701,480	191.0

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In West Virginia the number of "dairy cows," including heifers 1 year old and over, reported for

January 1, 1920, was 209,814, as compared with 239,539 "cows kept for milk" reported for April 15, 1910. This represents a decrease of 29,725, or 12.4 per cent. The number of "beef cows" reported for January 1, 1920, was 117,217, as compared with 63,740 "cows not kept for milk" reported for April 15, 1910, representing an increase of 53,477, or 83.9 per cent. The decrease shown for dairy cows is due partly, if not wholly, to the change in classification, and does not necessarily indicate a decline in the importance of the dairy industry. The increase shown for beef cows is likewise due in part to the change in the definition.

Farms reporting domestic animals: 1910.—Horses were reported by 70,777 farms in West Virginia in 1910, mules by 6,629 farms, cattle by 88,759, sheep by 26,179, and swine by 66,884. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in West Virginia decreased from 96,685 in 1910 to 87,289 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production, and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

Increase, 1909–1919					$3,938,548
Per cent of increase					155.5

[1] Based on the 1919 milk production as reported for dairy cows, and the number of dairy cows on hand Jan. 1, 1920.
[2] A minus sign (−) denotes decrease.
[3] Includes a considerable number of farms reporting small quantities of butter made as an incidental product from cows kept mainly for beef purposes.
[4] Less than one-tenth of 1 per cent.
[5] This item represents the total farm value of dairy products, excluding milk and cream consumed as such on the farm where produced.
[6] Figures for 1919 do not include "cheese sold," as that item was not reported for 1919. The value of cheese sold in 1909 was $7,134.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in West Virginia in 1919 for which the acreage was reported was 1,891,316, which represents 34.3 per cent of the total improved land in farms (5,520,308 acres). The total crop acreage reported for 1909 was 1,873,893, or 33.9 per cent of the improved land in farms (5,521,757 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 768 acres of mature crops grazed or "hogged off" and 110 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained in the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING. Number. 1919	1909	Per cent of all farms. 1919	1909	ACRES HARVESTED. 1919	1909	Per cent of increase.[1]	PRODUCTION. Quantity. Unit.	1919	1909	Per cent of increase.[1]	Value. 1919	1909	Per cent of increase.[1]

Sorghum grown for sirup	11,900	16,719	13.6	17.3	8,439	8,607	−2.0	Tons.	30,544	48,091	−36.5	564,851	300,188	88.2
Maple sugar and sirup	1,601	1,990	1.8	2.1								82,831	46,568	77.9
Broom corn	913	397	1.0	0.4	125	45		Lbs.	39,989	30,456	31.3	2,398	3,229	−25.7
Sundry minor crops [12]					(13)	1						2,127	751	183.2
Fruits, total												9,962,747	3,340,124	198.3
Small fruits	11,326		13.0		3,162	2,913	8.5	Qts.	2,092,376	2,336,562	−10.5	400,638	191,002	109.8
Other fruits												9,562,109 [14]	3,149,122	203.6

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
[2] Excluding 182,709 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] Includes a small quantity of emmer and spelt.
[4] Less than one-tenth of 1 per cent.
[5] Principally wheat and rye and wheat and oats grown and harvested together.
[6] Includes small quantities of peanuts and sunflower seed (1919 and 1909), of sugar-beet seed (1919), and of flaxseed (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops is probably a duplication of other crop acreage.
[7] The total value for 1909 includes the value of a small quantity of flower and vegetable seeds. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[9] Includes millet and Hungarian grass.
[10] The 1919 figures represent vegetables raised for sale only.
[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[12] These crops comprise hops and ginseng (1919 and 1909) and cotton (1909).
[13] Less than 1 acre.
[14] Includes the value of small quantities of figs and nuts.

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	568,219	676,311	724,646	592,763	565,785
Oats	169,915	103,758	99,433	180,815	126,931
Wheat	298,036	209,315	447,928	349,016	393,068
Buckwheat	31,095	33,323	21,410	13,696	30,334
Hay and forage	[1] 910,550	708,900	601,935	579,129	366,328
Potatoes	34,526	42,621	30,123	27,465	

[1] Includes 182,709 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 727,841 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

NORTH CAROLINA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for North Carolina collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

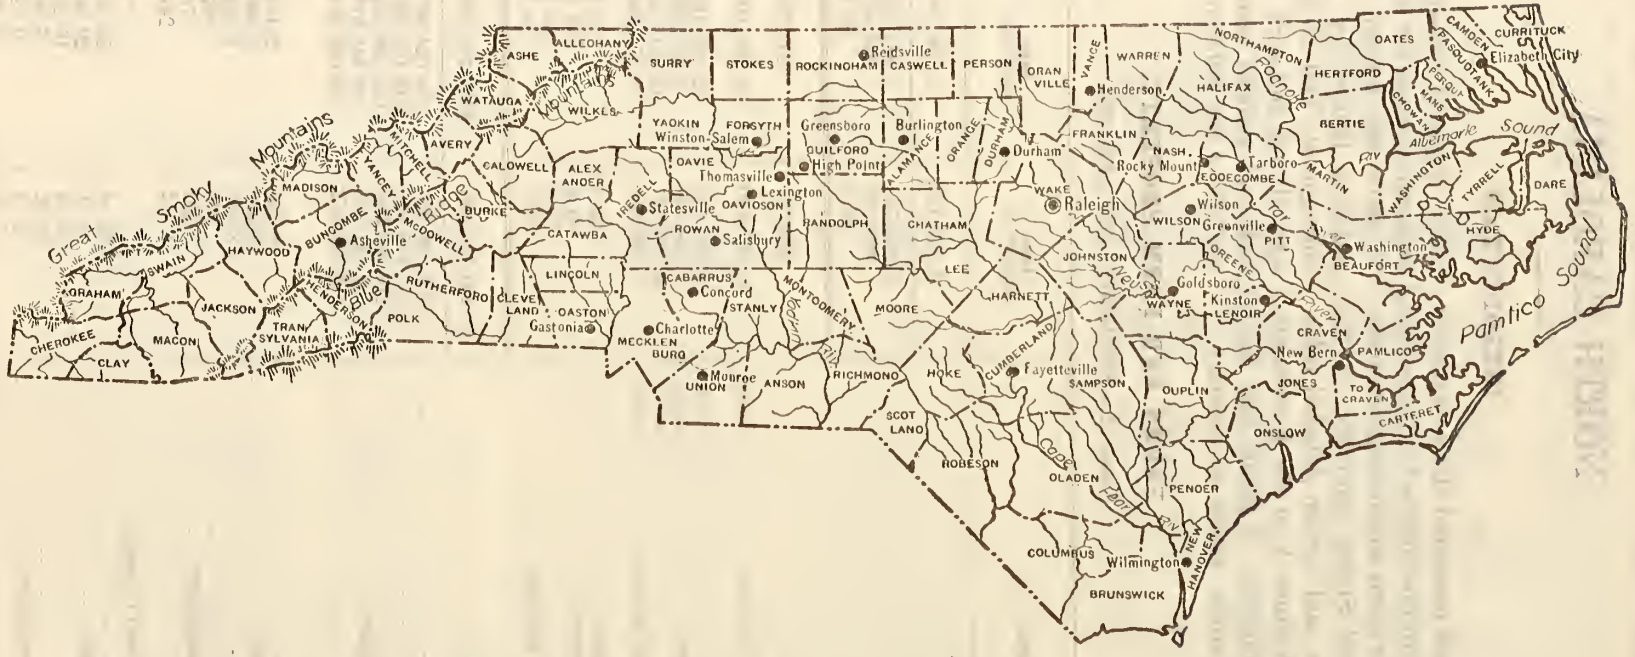
ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	2,559,123	2,206,287	352,836	16.0
Rural [2]	2,068,753	1,887,813	180,940	9.6
Urban	490,370	318,474	171,896	54.0
Per cent rural	80.8	85.6		
Number of farms	269,763	253,725	16,038	6.3
Approximate land area of the state.....acres	31,193,600	31,193,600		
All land in farms.....acres	20,021,736	22,439,129	−2,417,393	−10.8
Improved land in farms.....acres	8,198,409	8,813,056	−614,647	−7.0
Woodland in farms.....acres	10,299,547	12,451,739	−2,152,192	−17.3
Other unimproved land in farms.....acres	1,523,780	1,174,334	349,446	29.8
Per cent of land area in farms	64.2	71.9		
Per cent of farm land improved	40.9	39.3		
Average acreage per farm	74.2	88.4	−14.2	−16.1
Average improved acreage per farm	30.4	34.7	−4.3	−12.4
Value of all farm property	$1,250,166,995	$537,716,210	$712,450,785	132.5
Land and buildings	1,076,392,960	456,624,607	619,768,353	135.7
Land alone	857,815,016	343,164,945	514,650,071	150.0
Buildings	218,577,944	113,459,662	105,118,282	92.6
Implements and machinery	54,621,363	18,441,619	36,179,744	196.2
Live stock	119,152,672	62,649,984	56,502,688	90.2
Average value per farm:				
All farm property	4,634	2,119	2,515	118.7
Land and buildings	3,990	1,800	2,190	121.7
Land alone	3,180	1,352	1,828	135.2
Buildings	810	447	363	81.2
Implements and machinery	202	73	129	176.7
Live stock	442	247	195	78.9
Average value per acre of land in farms:				
All farm property	62.44	23.96	38.48	160.6
Land and buildings	53.76	20.35	33.41	164.2
Land alone	42.84	15.29	27.55	180.2
Buildings	10.92	5.06	5.86	115.8
Implements and machinery	2.73	0.82	1.91	232.9
Live stock	5.95	2.79	3.16	113.3

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,856,215. For this territory, the increase in population between 1910 and 1920 was 11.5 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

NORTH CAROLINA

COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920.

CENSUS YEAR.	FARMS.		LAND IN FARMS.				Per cent of land area in farms.	Per cent of farm land improved.

Unspecified	442	1,499	−1,057	−70.5	0.6	2.3

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100.

TABLE 11.—NUMBER OF FARMS AND PER CENT DISTRIBUTION, BY TENURE: 1880 TO 1920.

TENURE.	1920	1910	1900	1890	1880
Total number of farms	269,763	253,725	224,637	178,359	157,609
Farms operated by owners	151,376	145,320	130,572	[1] 117,469	[1] 104,887
Owning entire farm	131,847	121,382	115,118	([2])	([2])
Hiring additional land	19,529	23,938	15,454	([2])	([2])
Farms operated by managers	928	1,118	1,057	([3])	([3])
Farms operated by tenants	117,459	107,287	93,008	60,890	52,722
Share tenants [4]	98,758	80,215	73,092	50,318	44,078
Share-cash tenants	468	2,033			
Cash tenants [5]	15,916	20,708	19,916	10,572	8,644
Unspecified	2,317	4,331			
Per cent of all farms	100.0	100.0	100.0	100.0	100.0
Operated by owners	56.1	57.3	58.1	[1] 65.9	[1] 66.5
Owning entire farm	48.9	47.8	51.2	([2])	([2])
Hiring additional land	7.2	9.4	6.9	([2])	([2])
Operated by managers	0.3	0.4	0.5	([3])	([3])
Operated by tenants	43.5	42.3	41.4	34.1	33.5
Share and share-cash	36.8	32.4	32.5	28.2	28.0
Cash and unspecified	6.8	9.9	8.9	5.9	5.5

[1] Includes farms operated by managers.
[2] Not reported separately.
[3] Included with farms operated by owners.
[4] Includes croppers.
[5] Includes standing renters.

TABLE 12.—FARM ACREAGE AND VALUE, BY TENURE AND COLOR OF FARMER: 1920 AND 1910.

COLOR AND TENURE.	ALL LAND IN FARMS (ACRES).		IMPROVED LAND IN FARMS (ACRES).		VALUE OF LAND AND BUILDINGS.	
	1920	1910	1920	1910	1920	1910
All farmers	20,021,736	22,439,129	8,198,409	8,813,056	$1,076,392,960	$456,624,607

TABLE 16.—NUMBER, ACREAGE, AND VALUE OF FARMS, CLASSIFIED BY NATIVITY OF WHITE FARMERS AND BY RACE OF COLORED FARMERS: 1920 AND 1910.

COLOR AND NATIVITY OR RACE.	NUMBER OF FARMS.		LAND IN FARMS, 1920 (ACRES).		Value of land and buildings, 1920
	1920	1910	Total.	Improved.	
All farmers	269,763	253,725	20,021,736	8,198,409	$1,076,392,960
White farmers	193,473	188,069	16,584,294	6,341,309	846,858,683
Native [1]	193,081	187,657	16,538,442	6,325,745	843,742,983
Foreign-born	392	412	45,852	15,564	3,115,700
Country of birth:					
Austria	25	6	968	688	146,200
Canada	31	29	5,000	1,507	333,180
England	50	73	5,926	2,422	400,370
Germany	61	74	5,139	2,101	326,720
Holland	29	6	5,317	2,422	307,630
Italy	50	87	2,694	1,022	161,795
Scotland	30	34	8,639	1,805	845,655
Other countries	116	103	12,169	3,597	594,150
Colored farmers	76,290	65,656	3,437,442	1,857,100	229,534,277
Negro	74,849	64,456	3,370,191	1,816,019	223,666,166
Indian	1,440	1,197	67,231	41,061	5,866,911
Chinese	1	3	20	20	1,200

[1] Includes farmers with country of birth not reported, as follows: For 1920, 4,623; for 1910, 46.

TABLE 17.—NUMBER OF FARMERS, CLASSIFIED BY TENURE, COLOR, AND NATIVITY: 1920 AND 1910.

TENURE.	ALL FARMERS.		NATIVE WHITE.[1]		FOREIGN-BORN WHITE.		COLORED.	
	1920	1910	1920	1910	1920	1910	1920	1910
Total	269,763	253,725	193,081	187,657	392	412	76,290	65,656
Owners	151,376	145,320	128,774	123,510	325	367	22,277	21,443
Managers	928	1,118	820	1,032	12	12	96	74
Tenants	117,459	107,287	63,487	63,115	55	33	53,917	44,139

[1] Includes farmers with country of birth not reported.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	151,376	145,320	6,056	4.2	100.0	100.0
Free from mortgage	102,950	117,028	−14,078	−12.0	68.0	80.5
Mortgaged	24,499	26,642	−2,143	−8.0	16.2	18.3
Unknown	23,927	1,650	22,277	.....	15.8	1.1

[1] A minus sign (−) denotes decrease. Per cent not shown when more than 1,000. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	151,376	145,320	128,887	106,523	100.0	100.0	100.0	100.0
Free from mortgage	102,950	117,028	104,367	101,321	68.0	80.5	81.0	95.1
Mortgaged	24,499	26,642	19,589	5,202	16.2	18.3	15.2	4.9
Unknown	23,927	1,650	4,931	.....	15.8	1.1	3.8	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	20,149	19,252	897	4.7
Value of land and buildings	$103,282,055	$42,952,440	$60,329,615	140.5
Amount of mortgage debt	$31,968,285	$9,958,389	$22,009,896	221.0
Ratio of debt to value, per cent	31.0	23.2	.....	.....
Average rate of interest paid, per cent	6.0	.....	.....	.....
Average value per farm	$5,126	$2,231	$2,895	129.8
Average debt per farm	$1,587	$517	$1,070	207.0
Average equity per farm	$3,539	$1,714	$1,825	106.5

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	78,394	97,461	−19,067	−19.6	29.1	38.4
Fertilizer	228,767	181,718	47,049	25.9	84.8	71.6
Feed	128,964	76,837	52,127	67.8	47.8	30.3

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.[1]	
	1919	1909	Amount.	Per cent.
Labor, total	$12,035,960	$9,220,564	$2,815,396	30.5
Amount in cash	10,818,456	7,643,783	3,174,673	41.5
Value of rent and board furnished	1,217,504	1,576,781	−359,277	−22.8
Fertilizer	48,796,694	12,262,533	36,534,161	297.9
Feed	12,291,850	3,151,190	9,140,660	290.1

[1] A minus sign (−) denotes decrease.

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In North Carolina the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 354,557, as compared with

308,914 "cows kept for milk" reported for April 15, 1910. This represents an increase of 45,643, or 14.8 per cent. The number of "beef cows" reported for January 1, 1920, was 82,628, as compared with 106,553 "cows not kept for milk" reported for April 15, 1910, representing a decrease of 23,925, or 22.5 per cent.

Farms reporting domestic animals: 1910.—Horses were reported by 109,208 farms in North Carolina in 1910, mules by 110,747 farms, cattle by 186,158, sheep by 14,710, and swine by 198,127. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in North Carolina increased from 253,725 in 1910 to 269,763 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production, and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919, but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms Jan. 1, 1920, total	163,866	60.7	290,223	Head	
On farms reporting milk produced	138,182	51.2	249,802	Head

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in North Carolina in 1919 for which the acreage was reported was 5,849,998, which represents 71.4 per cent of the total improved land in farms (8,198,409 acres). The total crop acreage reported for 1909 was 5,736,176, or 65.1 per cent of the improved land in farms (8,813,056 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 50,474 acres of mature crops grazed or "hogged off."

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including land, buildings, implements and machinery, and live stock, and also for the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables. For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the products of the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

Other fruits and nuts												5,606,683	3,635,425	54.2

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
[2] Excluding 493,612 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] Less than one-tenth of 1 per cent.
[4] Principally wheat and oats grown and harvested together.
[5] Includes small quantities of sorghum seed (1919 and 1909), of tobacco seed (1919), and of flaxseed and castor beans (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.
[6] Includes small quantities of millet seed (1919 and 1909), of vetch seed (1919), and of flower and vegetable seeds (value only, 1909). The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[7] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[8] Includes millet and Hungarian grass.
[9] The 1919 figures represent vegetables raised for sale only.
[10] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[11] These crops comprise sugar cane, ginseng, and hops.

TABLE 33.—ACREAGE OF IMPORTANT CROPS: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	2,311,462	2,459,457	2,720,206	2,360,627	2,305,419
Oats	125,885	228,120	270,876	541,851	500,415
Wheat	620,659	501,912	746,984	666,509	646,829
Peanuts	125,766	195,134	95,856	17,767	
Hay and forage	[1]992,374	376,399	229,998	190,754	101,758
Sweet potatoes and yams	74,678	84,740	68,730	71,752	50,803
Tobacco	459,011	221,890	203,023	97,077	57,208
Cotton	1,373,701	1,274,404	1,007,020	1,147,136	893,153

[1] Includes 493,612 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 498,762 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

[1] Includes apricots, quinces, and (for 1910) mulberries. Since these fruits were not specifically called for by the 1920 schedule, the returns for that year are somewhat incomplete.
[2] The figures for 1910 and 1909 include oranges, lemons, Japanese persimmons, and pomegranates.
[3] The figures for 1910 and 1909 include almonds, and also black walnuts and several other varieties of nuts not called for by the 1920 schedule.

[2] The fact that the farm acreage shown for certain counties exceeds the total land area of the county is accounted for partly by the fact that the irregular boundaries of the counties make it difficult to compute exactly the total land area, partly by inaccurate farm surveys which exaggerate the farm acreage, and partly by the fact that the farms situated on the county line are included entirely in one county or the other.

COUNTY TABLE I.—FARMS AND FARM PROPERTY, 1920,

		Chatham.[1]	Cherokee.	Chowan.	Clay.	Cleveland.[2]	Columbus.	Craven.	Cumberland.[2]

SOUTH CAROLINA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for South Carolina collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	1,683,724	1,515,400	168,324	11.1
Rural [2]	1,389,737	1,290,568	99,169	7.7
Urban	293,987	224,832	69,155	30.8
Per cent rural	82.5	85.2		
Number of farms	192,693	176,434	16,259	9.2
Approximate land area of the state.....acres	19,516,800	19,516,800		
All land in farms.....acres	12,426,675	13,512,028	−1,085,353	−8.0

Woodland in farms.....acres	5,302,575	6,339,142	−1,036,567	−16.4
Other unimproved land in farms.....acres	939,941	1,074,887	−134,946	−12.6
Per cent of land area in farms	63.7	69.2		
Per cent of farm land improved	49.8	45.1		
Average acreage per farm	64.5	76.6	−12.1	−15.8
Average improved acreage per farm	32.1	34.6	−2.5	−7.2
Value of all farm property	$953,064,742	$392,128,314	$560,936,428	143.0
Land and buildings	813,484,200	332,888,081	480,596,119	144.4
Land alone	647,157,209	268,774,854	378,382,355	140.8
Buildings	166,326,991	64,113,227	102,213,764	159.4
Implements and machinery	48,062,387	14,108,853	33,953,534	240.7
Live stock	91,518,155	45,131,380	46,386,775	102.8
Average value per farm:				
All farm property	4,946	2,223	2,723	122.5
Land and buildings	4,222	1,887	2,335	123.7
Land alone	3,358	1,523	1,835	120.5
Buildings	863	363	500	137.7
Implements and machinery	249	80	169	211.3
Live stock	475	256	219	85.5
Average value per acre of land in farms:				
All farm property	76.70	29.02	47.68	164.3
Land and buildings	65.46	24.64	40.82	165.7
Land alone	52 08	19.89	32.19	161.8
Buildings	13.38	4.74	8.64	182.3
Implements and machinery	3.87	1.04	2.83	272.1
Live stock	7.36	3.34	4.02	120.4

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,274,914. For this territory, the increase in population between 1910 and 1920 was 9.0 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

SOUTH CAROLINA

COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920.

CENSUS YEAR.	FARMS. Number.	FARMS. Per cent of increase.	LAND IN FARMS. All land. Acres.	All land. Per cent of increase.[1]	Improved land. Acres.	Improved land. Per cent of increase.[1]	Per cent of land area in farms.	Per cent of farm land improved.

Feed	5,903,625	1,830,815	4,072,810	222.5

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In South Carolina the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 228,569, as compared with 180,842

"cows kept for milk" reported for April 15, 1910. This represents an increase of 47,727, or 26.4 per cent. The number of "beef cows" reported for January 1, 1920, was 64,949, as compared with 65,319 "cows not kept for milk" reported for April 15, 1910, representing a decrease of 370, or 0.6 per cent.

Farms reporting domestic animals: 1910.—Horses were reported by 58,633 farms in South Carolina in 1910, mules by 97,799 farms, cattle by 120,034, sheep by 1,731, and swine by 121,870. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in South Carolina increased from 176,434 in 1910 to 192,693 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms Jan. 1, 1920, total	115,159	59.8	187,846	Head	
On farms reporting milk produced	91,270	47.4	151,922	Head

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in South Carolina in 1919 for which the acreage was reported was 5,396,660, which represents 87.3 per cent of the total improved land in farms (6,184,159 acres). The total crop acreage reported for 1909 was 5,152,801, or 84.5 per cent of the improved land in farms (6,097,999 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 20,352 acres of mature crops grazed or "hogged off" and 26,893 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING. Number. 1919	1909	Per cent of all farms. 1919	1909	ACRES HARVESTED. 1919	1909	Per cent of increase.[1]	PRODUCTION. Quantity. Unit.	1919	1909	Per cent of increase.[1]	Value. 1919	1909	Per cent of increase.[1]

Other fruits and nuts	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	2,091,560	1,121,662	86.5

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
[2] Excluding 315,969 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] The 1909 figures include small quantities of harley, buckwheat, and kafir and milo.
[4] Principally oats and peas grown and harvested together.
[5] Less than one-tenth of 1 per cent.
[6] Includes small quantities of castor beans (1919) and of dry edible beans and flaxseed (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops is probably a duplication of other crop acreage.
[7] The 1909 figures include small quantities of flower and vegetable seeds (value only), timothy seed, millet seed, and "other grass seed." The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[9] Includes millet and Hungarian grass.
[10] The 1919 figures represent vegetables raised for sale only.
[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[12] These crops comprise broom corn (1919 and 1909) and chufas (1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	1,753,813	1,565,832	1,772,057	1,345,990	1,303,404
Oats	196,056	324,180	222,544	308,056	261,445
Wheat	84,621	43,028	174,245	115,510	170,902
Dry peas	136,303	265,632	143,070	.....	.....
Hay and forage	[1] 668,538	212,133	106,124	29,132	2,837
Sweet potatoes and yams	60,325	48,878	48,831	46,086	39,059
Tobacco	103,496	30,082	25,993	394	169
Cotton	2,631,719	2,556,467	2,074,081	1,987,469	1,364,249

[1] Includes 315,969 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 352,569 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

[1] Parts of Fairfield and Lexington Counties annexed to Richland County in 1913.
[2] Part of Sumter County taken to form part of Lee County in 1902.
[3] Parts of Williamsburg County annexed to Florence County in 1905 and 1911; part of Clarendon County annexed to Williamsburg County in 1914.
[4] The correction of errors discovered after the 1900 census reports were published would make this acreage for Spartanburg County 435,525.

GEORGIA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Georgia collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	2,895,832	2,609,121	286,711	11.0
Rural [2]	2,167,973	2,070,471	97,502	4.7
Urban	727,859	538,650	189,209	35.1

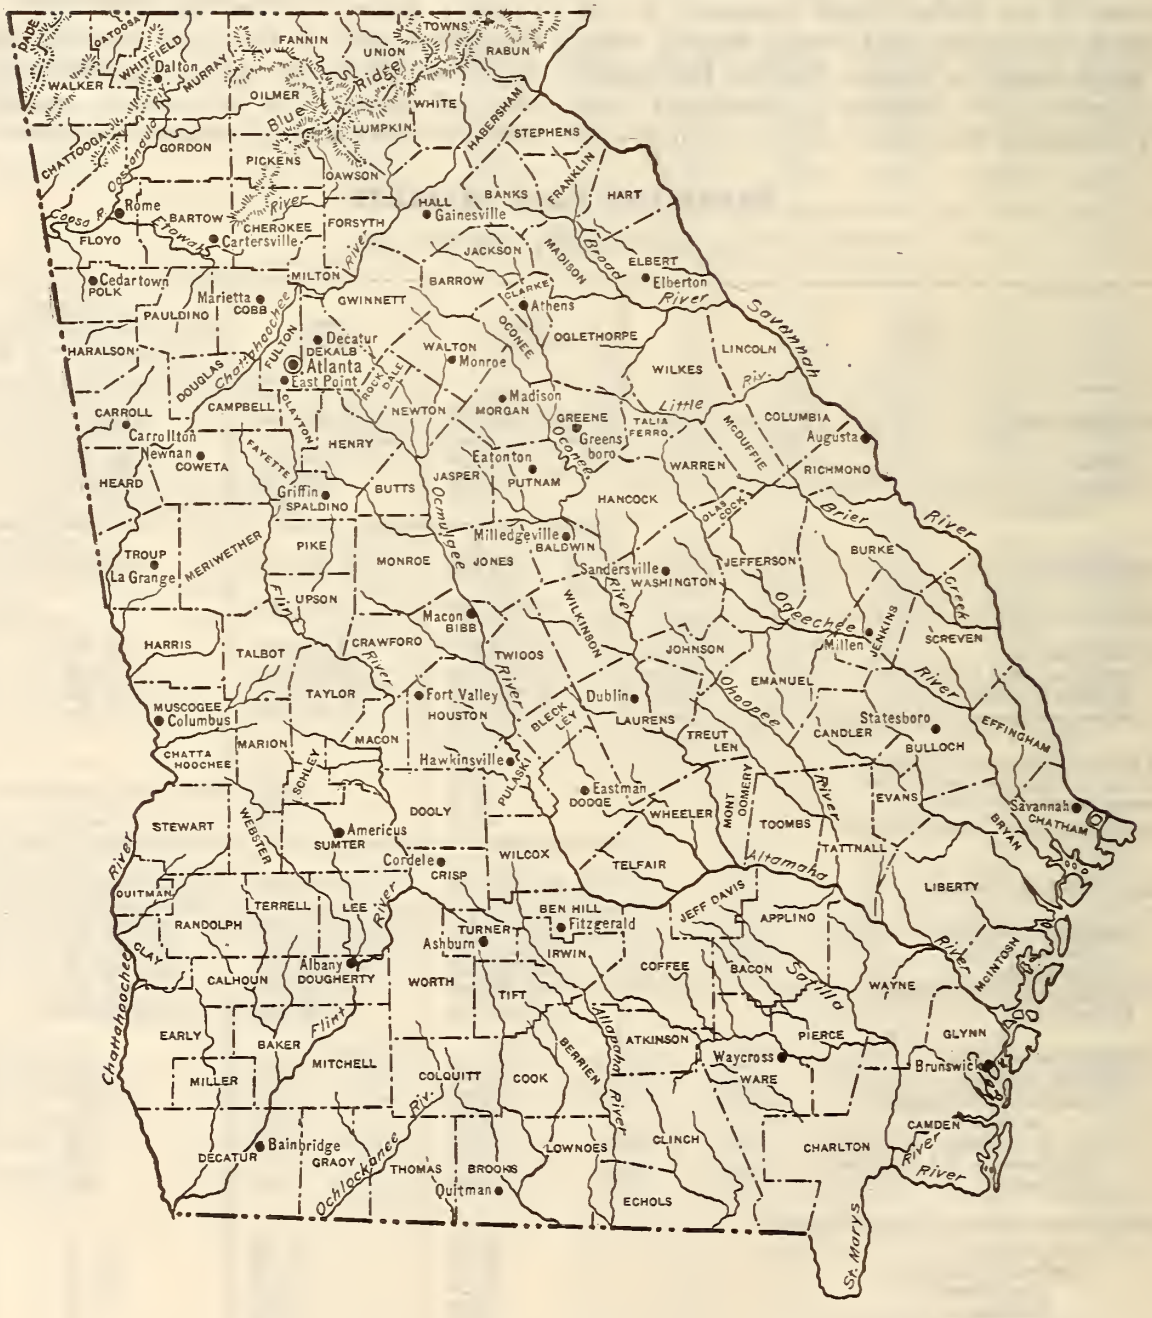
Live stock	155,043,349	80,393,993	74,649,356	92.9
Average value per farm:				
All farm property	4,366	1,995	2,371	118.8
Land and buildings	3,663	1,647	2,016	122.4
Land alone	2,888	1,273	1,615	126.9
Buildings	775	374	401	107.2
Implements and machinery	204	72	132	183.3
Live stock	499	276	223	80.8
Average value per acre of land in farms:				
All farm property	53.33	21.54	31.79	147.6
Land and buildings	44.74	17.78	26.96	151.6
Land alone	35.28	13.74	21.54	156.8
Buildings	9.47	4.04	5.43	134.4
Implements and machinery	2.49	0.78	1.71	219.2
Live stock	6.09	2.98	3.11	104.4

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 2,039,497. For this territory, the increase in population between 1910 and 1920 was 6.3 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

GEORGIA

COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

Table 2.—Number of Farms and Farm Acreage: 1850 to 1920.

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	20,797	13,839	6,958	50.3
Value of land and buildings	$124,579,125	$37,526,424	$87,052,701	232.0
Amount of mortgage debt	$37,671,385	$10,988,409	$26,682,976	242.8
Ratio of debt to value, per cent	30.2	29.3	.....	.....
Average rate of interest paid, per cent	7.3	.....	.....	.....
Average value per farm	$5,990	$2,712	$3,278	120.9
Average debt per farm	$1,811	$794	$1,017	128.1
Average equity per farm	$4,179	$1,918	$2,261	117.9

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures, it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	83,444	113,782	−30,338	−26.7	26.9	39.1

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$19,016,703	$13,218,113	$5,798,590	43.9
Amount in cash	16,705,234	11,185,852	5,519,382	49.3
Value of rent and board furnished	2,311,469	2,032,261	279,208	13.7
Fertilizer	46,196,434	16,860,149	29,336,285	174.0
Feed	9,538,763	4,097,043	5,441,720	132.8

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Georgia the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 484,122, as compared with 405,710 "cows

kept for milk" reported for April 15, 1910. This represents an increase of 78,412, or 19.3 per cent. The number of "beef cows" reported for January 1, 1920, was 282,067, as compared with 245,303 "cows not kept for milk" reported for April 15, 1910, representing an increase of 36,764, or 15 per cent. The percentage of increase shown for dairy cows would have been even larger, except for the change in classification mentioned above, and the percentage of increase shown for beef cows correspondingly smaller.

Farms reporting domestic animals: 1910.—Horses were reported by 87,257 farms in Georgia in 1910, mules by 186,512 farms, cattle by 213,203, sheep by 5,167, and swine by 213,447. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Georgia increased from 291,027 in 1910 to 310,732 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms Jan. 1, 1920, total	195,259	62.8	388,448	Head

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Georgia in 1919 for which the acreage was reported was 10,468,834, which represents 80.2 per cent of the total improved land in farms (13,055,209 acres). The total crop acreage reported for 1909 was 9,660,737, or 78.6 per cent of the improved land in farms (12,298,017 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 500,672 acres of mature crops grazed or "hogged off" and 523,690 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.

[2] Excluding 728,844 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

[3] The 1909 figures include small quantities of emmer and spelt and of kafir and milo.

[4] Less than one-tenth of 1 per cent.

[5] Principally oats and peas grown and harvested together.

[6] Includes small quantities of sorghum seed (1919 and 1909) and of flaxseed and velvet beans (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.

[7] Includes small quantities of flower and vegetable seeds (value only) and of millet seed. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.

[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.

[9] Includes millet and Hungarian grass.

[10] The 1919 figures represent vegetables raised for sale only.

[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

[12] These crops comprise broom corn and chufas (1919 and 1909), and ginseng (value only, 1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	4,269,455	3,383,061	3,477,684	2,582,316	2,538,733
Oats	187,525	411,664	318,433	516,886	612,778
Wheat	140,861	93,065	319,161	196,633	475,684
Dry peas	138,481	210,315	167,032	.....	.....
Peanuts	201,786	160,317	100,589	52,226	.....
Hay and forage	[1] 1,248,814	254,648	137,312	63,834	16,318
Sweet potatoes and yams	110,033	84,038	70,620	71,399	61,010
Cotton	4,720,498	4,883,304	3,513,839	3,345,104	2,617,138

[1] Includes 728,844 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 519,970 acres.

[5] Part of Franklin County taken to form part of Stephens County in 1905.
[6] Part of Clayton County annexed to Fulton County in 1908, and part of Campbell County annexed to Fulton County in 1916.
[7] The correction of errors discovered after the 1900 census reports were published would make this acreage 65,730.
